# FREQUENTLY ASKED QUESTIONS

Whether you want to be a master of the sky or learn to fly like a superhero. Indoor skydiving offers a truly exhilarating and rewarding adventure. Step inside one of the world's largest glass flight chambers where massive wind generators lift you effortlessly into flight on a cushion of air.

Learn the skills of expert skydivers. Indoor Skydiving is just like the real thing. Serious competitive skydivers use wind tunnels to refine techniques and fast track their aerobatic abilities.

Over 5 million people have flown across iFLY's extensive global network. Whether you're celebrating a special event, planning a corporate day out or looking for a new sport, there really is nothing like iFLY and the freedom of flight.

- Perfect for the whole family, your mates and work colleagues.
- Each introductory session includes your flights plus training, jumpsuit and all safety gear.
- All round viewing platform lets you share the magic with family and friends.
- An expert, personal instructor is always by your side to offer guidance and reassurance.
- With a freefall that lasts longer than an outdoor skydive, it's the real deal.
- Photos and videos available.
- Return within 3 months and save money with our Return Flyer packages.

## What is a vertical wind tunnel?

Pretty simple really. It's a large glass tunnel that extends skywards with powerful electric fans at the top. When these operate, air is pushed up through the tunnel, creating a cushion of air that you can fly on. The amount of airflow is precisely controlled to ensure that it is the correct speed for the person flying. Visit our website [ifly.com.au](http://ifly.com.au) for more details on the technology behind vertical wind tunnels.

## Is it safe?

Yes. Every aspect of the wind tunnel design has been carefully considered to create a fully controlled environment that provides total safety. Our certified and highly-trained instructors are with you at all times during your flight to give guidance and reassurance.

## Is it hard to breathe?

Not at all. It's a similar sensation to sticking your head out of a car window when it's moving. You'll feel the wind rush over your whole body as it lifts you effortlessly upwards. Just breathe normally and enjoy the ride.

## What happens if there's a power cut?

In the unlikely event that the electricity supply were to fail, the combined fans will slow down providing a degree of residual pressure which will allow you to be lowered to the ground in a safe, controlled manner.

## How long is a flight?

Each flight within the wind tunnel lasts for almost 1 minute. That's actually more freefall time than a skydive from 14,000 feet. Our Standard flight package includes 2 flights, with an instructor helping you make the most out of your time. You can also choose to add additional flights to your packages. The whole experience normally takes approximately 1.5 hours however this will be dependent on your group size and how many flights you are doing.

## Is it scary?

It's really exciting and challenging, but we wouldn't call indoor skydiving scary. You don't have to leap off anything and there's no sensation of falling or anything that could make you feel motion sickness. We really do recommend anyone to try it.

## Do I jump in from the top?

No, you just lean into the flight chamber at ground level with your flight instructor. First time flyers generally only fly a couple of metres above the net with your instructor by your side all the way.

## How do I fly at the top of the tunnel?

As your experience in indoor skydiving progresses your instructor will teach you how to control your flying and to fly safely at different levels. As a beginner flyer we do offer an iFLY High package where you fly towards the top of the tunnel with your instructor by your side for \$10 extra. This is subject to availability.

### Who can fly?

There's no experience required, so beginners, intermediates and experts can all fly. Of course, you need to be in good health and physical condition. If you've had a prior shoulder dislocation or back or neck problems, please contact us before booking to discuss your suitability. Anyone with a hard plaster cast, pregnant or under the influence of alcohol or non-prescriptive drugs is also unable to fly. Please read the waiver for full details.

Our facilities are wheelchair accessible and can fly people with certain physical disabilities, including amputation and paraplegia. Please contact us for details - we'd love to get you flying!

### How old do you have to be?

Flyers can be as young as 3 years old, with no upper age limit. Children under 18 years of age need to have a parent or guardian's signature on their waiver.

### Is there a weight restriction?

If you are under 180cm, the weight limit is 105kg, and 115kg if you are over 180cm. If you don't fit into either of these categories, please contact us and we will discuss your personal situation.

### Can I fly with anyone else?

With our iFLY Introductory packages we normally only fly people individually in the tunnel, one-on-one with their instructor.

The rest of the team can still share the experience, watching from the open plan observation deck.

### What time should I get there?

Please arrive 1 hour before your flight time to ensure everyone has signed their waivers and to get you geared up ready to fly. Your arrival time will be included on your booking confirmation, if you have any questions please contact a member of our Customer Flight Team.

### What should I wear?

Please wear well-fitting, lace-up sneakers or running shoes. Other shoes are not suitable. Wear casual clothes, preferably pants and a shirt with no collar. You won't have to change out of these clothes - you simply put your flight suit on over them.

### Why do I need to wear a flight suit?

The instructors are trained to grasp the handles of your flight suit, should you need assistance.

### Can I do tricks and flips in the tunnel?

iFLY's first concern is for your safety – so tricks and flips are only done by more experienced flyers. Everyone starts off flying on their belly, but we can help you gain the experience you need to work towards flying like the pros.

### Will I need to take off my watch and jewellery?

Yes. You should remove any items that might flap around or become loose, such as earrings, necklaces, bracelets, watches, rings, and hair accessories. In addition, you should remove everything from your pockets. We do have lockers for your use, but we recommend that you leave anything valuable at home, as we cannot be responsible for lost or stolen property.

### Can I wear my glasses?

Yes. We have larger goggles that fit straight over your glasses.

### What is the sport of indoor skydiving?

Indoor skydiving was originally developed to allow experienced skydivers to train, whatever the weather. These days, it's soared in popularity around the world and become an adventure sport in its own right. If you're interested, our instructors can help you improve your flying skills and master the skills required for competitive events. Visit our website [ifly.com.au](http://ifly.com.au) for more information.

### Is there a Cafe?

There is a Cafe on site at iFLY Downunder which provides coffees, juices, smoothies, fresh food, snacks as well as catering for special events.

## LOCATION
