

Customer Assist Program

Home water efficiency check

Make every drop count at your place. With the help of a licensed plumber, Customer Assist Program customers can reap the benefits of efficient water use.

A home water efficiency check will identify any plumbing problems and leaks at your place and help you save money on your bills.

Knowing where and when you use the most water around your home, will help you understand where savings can be made.

Your home water efficiency check by a licensed plumber can include:

- water pressure test
- flow test of all internal taps
- installation of aqualocs, flow regulators and/or water efficient aerators
- repair of minor indoor tap leaks
- replace any leaking outdoor taps
- check toilet cistern for leaks
- replace up to two showerheads with three-star rated water efficient showerheads
- advice on further water saving opportunities.
