

# Drillman's end to end Solutions begin with the relaunch of the UDR Brand of Drilling Rigs

**D**rillman is redefining a customer centric approach to Explorations Drilling. Our focus is you, and how we can assist you to increase profits, decrease risks and set new industry standards by achieving the desired quality outcomes required on every drilling project.

With a focus on innovation and reliability, Drillman specialises in working with drillers - in the field - to bring firsthand what's required to improve operational performance and best-in-class safety.

Our unwavering focus on growth, development, and progress for your business underpins our core offering - a complete, end to end solution for you.

Informed by this purpose, we invite you to consider our range of products and after-market services. Manufacturing of drill rigs, full safety audits, mine compliance, precision engineering, rebuilds and retrofits of all drilling equipment and ancillary equipment used in day-to-day drilling operations - Drillman has you covered.

Our state-of-the-art Sandvik designed Surface and Underground Drilling rigs are complemented by a wide range of tooling packages tailored to each drill model. Selected models can be ordered with RigNet - Drillman's real-time, rig monitoring system (RMS).

Our inhouse designers and engineers possess the industry know-how to support any equipment challenges you face.

Working closely with you, we'll develop a customized plan tailored to your individual requirements and specifications and optimized for your project's success. Bespoke engineering and workshop repairs capable

Drillman relaunches the UDR brand in Australia by introducing UDR1200HC (High-Capacity), delivered to Top Drive Australia

of handling any fleet configuration are available via online ordering, as are fast turnaround access to spare parts.

As we enter the second quarter of 2022, we're pleased to announce the relaunch of the well-known UDR brand.

Originally manufactured and designed in Australia over 10 years ago, the UDR1200 HC is a high-capacity multipurpose drill rig which we are thrilled to bring back to the market. A ubiquitous industry mainstay, the UDR brand was marketed over the last decade as the Sandvik DE880, and developed both a strong reputation for solid performance, and as a competitive, cost-effective

solution offering superior depth capacity for both diamond and RC drilling applications.

Following Drillman's acquisition of the Sandvik exploration business, adhering to the exacting standards set by Sandvik coupled with additional Drillman innovations, our team of designers and engineers are now presenting UDR rigs for purchase.

The inauguration of the UDR brand has commenced at the Drillman Caboolture facility in Queensland Australia with the recent delivery of the first UDR1200HC (High-Capacity) to Top Drive, Western Australia drilling contractor. **AMR**

*This is a milestone achievement for Drillman to take the UDR Brand and relaunch it by manufacturing it in Australia.*
