

HDA HOSE PRO

HDA Hose Pro is manufactured using only the highest quality of HDPE available to give outstanding technical properties with exceptional crush and outstanding abrasion resistance, these combined ensure you get the maximum service life from your hoses.

Our spiral shaped guard is self-lubricating for ease of installation, has rounded edges with domed profile and can be installed on the hose either before or after it has been fitted to the machinery.

Our entire range of products conform to the requirements of MDG 41 and our Flame Retardant and FRAS products are MSHA and ISO approved.

Hose Pro's performance is second to none and stands well above inferior products on offer. When it comes to class leading hose protection, then Hose Pro is the only choice.
