

## Ontario Home Renovation Savings Program by Enbridge and IESO

Enbridge Gas and Save on Energy along with the Ontario Government have all partnered together for the Home Renovation Savings Program (HRS) that started on 28 January 2025. This program is to help Ontarians improve their homes energy efficiency and comfort. To sign up for the program please visit their website at [Home Renovation Savings](#).

HRS has 2 different streams within the program the Home Energy Audit Stream and the Non-Energy Audit Stream

### Home Energy Audit Stream

You will start by going to their website to sign up and will be sent a list of companies in your area that will do the initial home energy assessment. Once the initial assessment is complete then you will need to complete a minimum of two energy-saving upgrades to qualify for rebates. Final audit must be completed within 180 days of first audit or by 31 December 2025.

#### Attic Insulation:

Current insulation R12 or less to R50 - \$1500

Current insulation R12 - R25 to R50 - \$1200

Current insulation R25 - R35 to R50 - \$900

Cathedrals - \$780

## Insulation Basement Walls:

0 insulation to R22 to 100% - \$1500

current insulation does not meet R22 requirements  
(need to add and from R10 - R22)- \$900

Basement Slab - \$500

Insulating Basement Headers - \$300

## Insulating your Crawl Space:

0 insulation to R22 to 100% - \$1200

current insulation does not meet R22  
requirements (need to add and from R10 - R22)-  
\$600

Crawl space Ceiling R24 to 100% - \$1200

## Insulating Exterior Walls (not basement):

0 insulation to R20 - \$3600

current insulation does not meet R20  
requirements (need to add and from R12 - R20)-  
\$2100

current insulation does not meet R20  
requirements (need to add and from R7.5 - R12)-  
\$1200
