

MARC Cars Australia is pleased to announce its latest addition to the MARC cars stable – the MARC GT.

The MARC GT is an upgrade on the current and very successful MARC Focus & MARC Mazda launched in 2014.

The MARC GT continues to champion the already successful platform of the MARC concept – a cost effective & driver friendly racecar suited to both grassroots and professional competitors.

The car is designed and manufactured in partnership with PACE Innovations and showcases a sleek new GT style body.

The first MARC GT recently made its debut at QR during Round 1 of the new 2023 MARC Cars Championship Cars Championship with AMRS.

**Don't hesitate - secure your chassis now!**
