

Subsurface Mapping Solutions Pty Ltd: A Closer Look

Introducing Subsurface Mapping Solutions Pty Ltd

Subsurface Mapping Solutions Pty Ltd is an Australian-based company, situated on the Gold Coast, in sunny Queensland that specializes in providing a range of innovative solutions for subsurface mapping. With many years of experience, Subsurface Mapping Solutions has become one of the most trusted names in the industry for delivering reliable and accurate results with their advanced technologies. They are committed to helping clients achieve their goals by finding new ways to explore beneath the surface. Whatever the project, Subsurface Mapping Solutions provides comprehensive solutions that can meet any challenge. With a team of experienced professionals dedicated to innovation and customer satisfaction, Subsurface Mapping Solutions Pty Ltd is your go-to source for all things related to subsurface mapping.

Overview of the Services Offered by Subsurface Mapping Solutions Pty Ltd

Subsurface Mapping Solutions Pty Ltd (SMS) is a leader in the field of subsurface mapping, providing clients with comprehensive solutions to their underground exploration needs. With cutting-edge technology and experienced professionals dedicated to innovation and customer satisfaction. Their services extend beyond traditional utility detection and include subsurface services to detect and map geophysical and archaeological assets including voids, geological and archaeological features and other subsurface assets. All of our utility technicians are experienced, qualified and have attended specific training to hone their skills.

Our niche service offering extends to all types of CCTV condition assessments, trenchless pipe repair technology and concrete scanning.

Andrew Watson - The Man Behind the Company

Andrew Watson is an ambitious and dedicated individual who has worked hard to achieve success in life. He is the driving force behind Subsurface Mapping Solutions Pty Ltd, which he founded 2020 and has been leading it ever since.

His vision was to provide quality services to the Civil Construction industry that would benefit businesses and his leadership has helped turn Subsurface Mapping Solutions into a thriving enterprise with a loyal customer base. Andrew's commitment to excellence has allowed him to cultivate an innovative environment

where employees are encouraged to think outside of the box, ultimately helping propel Subsurface Mapping Solutions forward.

A leader in this space for over 20 years, Andrew Identified a need and has provided solutions to the difficulties major projects encounter when working around underground utilities. Andrew is a firm believer in arming his staff with the most up-to-date equipment available. The most recent example is his investment in the IDS Stream DP Ground Penetrating Radar (GPR) from C.R. Kennedy. This multichannel GPR array solution for real-time 3D mapping of underground utilities and features, is the first in Australia.
