PGH Bricks & Pavers™ is one of Australia’s largest clay brick manufacturers. It offers a broad range of bricks and pavers for residential, architectural and commercial applications on Australia’s East coast.

PGH Bricks & Pavers™ is committed to service excellence and has manufacturing capabilities in South Australia, Victoria, New South Wales and Queensland.

PGH Bricks & Pavers™ has a long history and deep expertise in brickmaking excellence. The name first came into existence in 1958 when the building companies established by Maxwell Porter and David Galbraith (incorporated in 1899 and 1949 respectively) merged with Hanson Consolidated industries.

PGH Bricks & Pavers™ was then part acquired by CSR in 1989, marking CSR’s first foray into the brick industry. In May 2015, CSR and Boral formed a joint venture, Boral CSR Bricks Pty Ltd, which combined their brick operations along the east coast of Australia. This

partnership brought together the best of Boral and CSR’s brick offering under the one brand of PGH Bricks & Pavers™. In November 2016, CSR acquired Boral’s interest in the joint venture. PGH Bricks & Pavers™ is now wholly owned by CSR.

CSR is one of Australia’s oldest companies and today has revenues over \$2.0 billion and is part of the ASX100 with over 3,000 employees across Australia and New Zealand.

See [csr.com.au](https://www.csr.com.au) for more information.

COVER IMAGE - MORADA: CENIZA STANDARD

Good design and timeless style start from the outside.

Durable, strong, and timeless in style, bricks are a superior and progressive material available in a myriad of colours, shapes, textures and sizes.

They also bridge the boundary between outdoor and indoor spaces, providing a stylish and seamless flow from the living room to your back garden.

The 2019 PGH Bricks Style Guide presents nine exterior and interior palettes, providing you with everything you need to start your build journey with confidence.

ENDLESS STYLE FROM THE OUTSIDE IN

New to our Style Guide this year is inspiration and information on how you can not only use bricks outside, but how you can bring this beautiful and creative material indoors as well.

Whether exposed and dominant, calm and quiet, or painted over in colourful tones, bricks balance effortlessly with other interior materials, providing new possibilities for how you live and feel inside your home.

We invite you to explore your style and discover how brick can bring new possibilities to how you live.

BE INSPIRED

BE SURE | BE YOU

Whether you are building or reinventing your dream home, the process can be a memorable and life-changing experience. With important decisions to be made on every detail, from small space solutions to big-ticket purchases, building can feel overwhelming and stressful. Whilst choosing the perfect bathroom tiles may seem top priority, beginning the building process from the outside-in helps simplify and inform other decisions.

Durable, strong, and timeless in style, bricks are not only a superior and progressive material, but a versatile design tool available in a myriad of colours, shapes, textures and sizes. More desirable than ever, they allow endless customisation opportunities for

contemporary Australian homes and building design alike. Choosing your bricks before the benchtops simply makes sense. Surface materials, tapware and fittings, after all, are easy to swap out. Bricks remain forever.

Begin your journey with two important questions – what is my style, and how do I want to live and feel in my space? After all, homes are about the people who live in them, not just the materials they are made of.

The 2019 PGH Bricks Style Guide is designed to help you identify your style and achieve a bespoke home without the stress of too many choices.

WHY CHOOSE BRICKS?

SOLID INVESTMENT

Building with bricks equals fewer upfront costs and virtually no ongoing maintenance costs, as well as energy bill savings. When it's time to sell, brick rates well because it's trusted over newer cladding materials that haven't stood the test of time.

ENERGY EFFICIENT

Brick insulates in a way most materials do not. By following good design principles and combining bricks with insulation, your home will keep warm in winter and cool in summer, so you'll love coming home.

CREATIVE COLOUR & CHOICE

With our diverse range of sizes, shapes and textures, and over 180 colours, we have a brick to meet your needs. With smart design, blending of brick types and diverse bricklaying techniques, the options with bricks are truly endless.

STRONG & SAFE

Bricks are permanent. They're weather and age proof. Bricks don't get tired like other man made materials. They won't twist or warp, rot or decay, erode or dent. They are resistant to the extremes of the Australian climate and being non-combustible, they don't assist the spread of fire.

LOW MAINTENANCE

Bricks require virtually no upkeep or repairs, avoiding ongoing costs. Unlike other products, the colour is baked into the product so it lasts for a lifetime. Remember, render will need to be repainted over time, an important fact to consider when looking at the 'whole-of-life' cost of your home.

SOUND REDUCTION

The density of brick makes for a quiet home, with dramatically reduced external sound, such as aircraft, road traffic and noisy neighbours. Brick can also reduce noise transfer within the home when used on internal walls.

OUR TOP TIPS FOR CHOOSING YOUR BRICK

Bricks are strong, durable and a popular choice for new home builders and renovators.

With such a broad range of great options available, choosing bricks may seem overwhelming. Here are our top tips to guide you in confidently choosing the right brick for your home.

1 Style of your house

The material that your house is built from also forms the foundation (literally) of its aesthetic appeal. The colour, shape, size and texture of the bricks you choose will influence the overall look and feel of your house. Before you make your final decision, it's worth gathering ideas online, from display homes, websites and magazines. When renovating, consider how new bricks will appear alongside existing materials.

Many homeowners find it helpful to pull together a "mood board" of images of the styles of homes they are drawn to. Simply save images (either physically or digitally) of favourite buildings, bricks, trims and even interior ideas. As your mood board develops, it will often become apparent which style of home best suits your aesthetic and lifestyle.

Need a bit of help getting started? Take the PGH Bricks Style Quiz and immerse yourself in the creative process of design and building and sharpen your focus. Whichever your preference, bricks are the perfect building material for creating your ideal home, and our nine exterior and interior palettes will inspire you to have confidence and find happiness in your build journey.

TAKE OUR QUIZ & DISCOVER YOUR STYLE
PGHBRICKS.COM.AU/STYLEQUIZ

2 Consider your location

Bricks are graded to suit different environmental conditions. The location of your home will determine which grade you need. If you live near the coast or have high-saline soil, you may benefit from exposure grade bricks (EXP)* which have heightened resistance to salt attack. General purpose (GP) grade bricks are suited to all other building types and locations. Talk to your builder about any special environmental conditions you should be aware of.

3 How does it look

COLOUR & TEXTURE

One of the big current trends in exteriors, textural elements can add character, charm and individuality to a home. Brick textures range from a smooth finish, which has a consistent surface and ceramic-like appearance with straight edges, to a more artisan-style effect, with a dragged or ripped appearance for a weathered look.

You can even get glazed bricks that have a shiny ceramic tile look for feature walls (perfect for the mid-century design trend) or beautiful Crafted Sandstocks bricks that give a home an authentic raw beauty that no other material can achieve.

SIZE

Bricks are also available in a range of dimensions. Decisions about size may depend on factors such as the proportions of the house, the purpose of the bricks and the visual effect you need.

4 How does it stack up

A bond is a pattern in which bricks are laid. The most commonly used bond is Stretcher bond, which consists of courses of full bricks where every course is offset half a brick from the course below. Stacked and Flemish are also popular bonds that can achieve alternative looks, or get creative with hit-and-miss brickwork to achieve screening and allow natural light to shine through your space.

STRETCHER BOND

STACKED BOND

FLEMISH BOND

5 What holds it together

MORTAR COLOURS

An off-white mortar between darker coloured bricks will add contrast and highlight the shape of each brick, making the bricks the hero. However, matching the colour of the mortar with that of the brick will soften the brickwork and present a unified appearance. This is especially common with the use of lighter shades of bricks.

MORTAR JOINT FINISH

With the mortar joint, you can choose a round ironed, flush or struck finish, depending on whether you want to highlight or soften the effect of the brickwork. For instance, a raked joint will create shadowing for contrast and interest. A flush joint will minimise shadow with a flat, streamlined look.

HOW WE CAN HELP.

We know that building and renovating can be a confusing and stressful experience. We want to ensure your experience is an enjoyable one, so we've provided a range of tools to help you along the journey.

VISUALISE YOUR DREAM SCHEME WITH THE PGH 3D VISUALISER

The PGH 3D Visualiser enables you to mix and match PGH bricks and pavers with roof tiles and trims to help you visualise the exterior of your dream home. Using the latest 3D technology, you will be able to view your combination of colours and textures on a variety of home designs in 360 degrees, across your desktop, tablet, phone or VR device. It's a great place to start when visualising what colour and textures work well together. Use our predefined styles or create our own. There are countless combinations to be made!

Visit pghbricks.com.au/visualiser today to begin visualising today.

VISIT ONE OF OUR PGH™ SELECTION CENTRES

Our PGH™ Selection Centres are a perfect place to experience the look and feel of our products and seek expert advice in helping you choose your facade selection.

Make an appointment to see one of our Colour Consultants who will be able to assist you through your brick selection process.

Given your facade is likely to be made up of 60% bricks, 30% roof and 10% gutter, we want to ensure you achieve the look you're after.

We even have specially designed selection tools to make the selection of your whole exterior scheme easier.

There is nothing like seeing colours and textures in real life. We have an array of bricks and pavers on display in our centres. When you've decided on your preferred brick, don't forget to ask for a sample to take home.

THE PGH™ WEBSITE - YOUR ONE STOP SHOP FOR INFORMATION AND INSPIRATION

The PGH™ website aims to educate, inspire and inform. Learn why bricks are a brilliant building material, get information on brick trends, be inspired by our photo gallery and see our extensive collection.

DRY PRESSED
ARCHITECTURAL

Our Dry Pressed Architectural bricks represent PGH's highest pinnacle of luxury and style in Australian-made clay brick products.

Exquisitely produced at state-of-the-art brick-making facilities using a time-honoured dry pressed method, this range presents with exceptional consistency of strength, dimensional accuracy and colour all the way through the brick. Produced under high compression, dry clay is pressed into individual moulds, which creates a magnificent, solid colour-through brick with sharp, clean and accurate edges.

Highly sought after and specified by architects, developers, quality builders and discerning home owners, the PGH™ Dry Pressed Architectural range is the choice for superior showpieces and builds in residential and commercial applications.

HONESTLY ARTISAN

Especially designed for those who gravitate towards a modern interpretation of authenticity and unrestrained character, we present the raw and gritty Honestly Artisan range. With a unique artisan look and feel, this adaption of the classic Australian sandstock brick has been especially created with an imperfect, roughened surface texture and a highly desirable colour-through quality.

Available in three solid brick choices, we have Chalk - a highly sought-after warm white; Hessian - a natural brown grey; and Bespattered - an industrial mottled brown grey with a randomly splashed white coating.

These bricks have a certain gravelly charm about them that is highly valued by designers who seek products which enable a mood to be created that presents with integrity. Architects tend to describe these products as unashamedly genuine, unique and real.

CHALK

BESPATTERED

HESSIAN

"The Honestly Artisan range is perfect for those with an appreciation for authenticity and craftsmanship but crave to create a uniquely custom, liveable masterpiece."

CRAFTED SANDSTOCKS

Our Crafted Sandstock bricks honour an important part of our history, the traditional method of brick making. Only a handful of companies still make these 'Convict Bricks'.

Incredibly wet clay is dropped into large sawdust lined moulds to produce solid bricks with very individual rough and irregular textures and shapes, giving them their hand-made character and beautiful appearance. Fired in intermittent batch kilns, we can alternate the temperature to produce a variety of colours and tones, reminiscent of the very old down draught wood or coal fired kilns.

PGH™ Crafted Sandstock bricks are timeless in their look and feel and deliver a statement of Australian tradition and authenticity. Not unexpectedly, as a true brick representation, designs specifying this style of brick can transcend between modern interpretations of contemporary rustic architectural design whilst also being completely suited to achieving an authentic colonial period or traditional heritage look.

MANHATTAN

INDUSTRIAL CHIC BRICKS

The Industrial Chic movement has fuelled the inspiration behind the creation of our bespoke, locally made Manhattan range of recycled-look and feel bricks.

The urban and raw Manhattan range is signified by bricks that have been purpose-made to take on the weathered and tumbled imperfections of intended knots, scratches and nicks and colour blending designed to bring to life an edgy, exposed brick wall look and feel.

But unlike many recycled brick products, the Manhattan range has been produced with today's modern technological advancements behind the crafted manufacturing process, ensuring these bricks deliver consistent strength, durability and longevity as well as the benefits of Exposure Grading that actual recycled bricks may not have.

PURE LINENS

BRICKS OF COUNTRY-CRAFTED
SOPHISTICATION

Have you ever wished you could take a little piece of the country home? That feeling of being surrounded by nature, with gum trees, big skies and views that seem to go on forever.

Introducing Pure Linens - bricks that gently connect country authenticity with urban life. Painstakingly crafted by our passionate artisans from our factory in the small town of Jindera, not far from the New South Wales / Victoria border, they bring country soul to the heart of your home with sophistication and style.

Pure Linens is a new premium range of bricks available in a stunning palette of four, city-style, sophisticated neutral shades.

Each brick has its own finely-curated and subtle hue, which delivers a smooth, surface texture and the highly desirable colour-through brick quality.

These beautifully crafted, quality Australian-made bricks will transform your home and leave you with a feeling of soft country elegance and style.

METALLIC

The PGH™ Metallic range are a clay extruded, wirecut brick finished with a subtle metallic sheen to achieve a more opulent effect. Often used as the dominant façade surface in many modern residential designs, this popular brick can be used to achieve a diverse spectrum of design look and feels.

PGH™ Metallic bricks were recently raised to a new level of fame when selected on The Block 2017 as the hero façade brick in the house rear extension by Sticks and Wombat. Used with a matching dark mortar, this particular look and feel became an overnight hit and now continues to be a highly sort after combination.

CHADONNAY SOUTHERN LEDGESTONE

ASPEN SOUTHERN LEDGESTONE >

Remember how you felt the first time you walked into your dream home? That excitement and pride never goes away when you enhance the exterior of your home with Cultured Stone®. Whether pulling into your driveway or catching a parting glimpse in the rear view mirror, the character and charm of Cultured Stone® makes a bold and lasting impression.

There is no question that stone is loved for its strength, durability and authenticity. It is recognised as a material that adds beauty and character to any space. But despite this, stone can be heavy, difficult to install, expensive and limited in terms of choice.

PGH Bricks & Pavers™ recognised the opportunity to overcome these issues and has introduced Cultured Stone® to the eastern states of Australia.

With 50 years in the US market, Cultured Stone® is a manufactured stone cladding product that has all the qualities of traditional stone but with significant added benefits. Modelled from natural stone and created with painstaking care and artistry, Cultured Stone® achieves the depth, complexity of colour, pattern and unique texture of stone. With eight distinct ranges and a diverse palette of colours, there are numerous options for size, shape and texture, providing the freedom to create a truly personal look.

WHY CHOOSE CULTURED STONE®

- The leader in cladding products for interior and exterior applications
- Contains a minimum 58% of recycled content
- Superior durability and long life-cycle covered by our 50 Year Limited Warranty
- Distributed locally by PGH Bricks & Pavers™
- Stock held locally
- Manufactured in USA
- Does not require painting, coating or sealing after installation
- Corner pieces available

BENEFITS OF CULTURED STONE® OVER NATURAL STONE

- Lightweight and affordable
Making it a more accessible material
- Wide range to choose from
Create a truly personalised look
- Can be used both outdoors and indoors
From feature walls to fireplaces, water features* to alfresco areas
- Engineered to last
Maintaining beauty and strength for at least 50 years

*SEE TECHNICAL INFORMATION GUIDE FOR APPLICATIONS PRONE TO SMOKE, SOOT, DIRT OR WATER SPLASHING. CULTURED STONE® SHOULD NOT BE IMMERSSED IN WATER.

MODERA PRO-FIT™

Our Modera Pro-Fit™ range offers a practical way to achieve a tailored ledgestone look with small-scale, low relief stones. It's quick and easy to install because it isn't applied one stone at a time. Instead, the primary building blocks are groups of small stones meticulously bundled together to form modular components of equal height.

PRO-FIT® ALPINE LEDGESTONE

Pro-Fit® Ledgestone stone cladding is a practical way to achieve a custom look. Small-scale, low relief stones are made meticulously bundled together to form modular components of equal heights. The component pieces feature a patented interlocking mortar groove for a secure adhesion without grouted joints.

PRO-FIT® LEDGESTONE

Pro-Fit® Alpine Ledgestone stone cladding provides a rustic outdoor look that's easy to install. This precise, rugged ledgestone texture provides colour and shadow creation for a variety of design opportunities.

ACCESSORIES

Finishes communicate the care and attention to detail afforded to designing dream homes and well-appointed places of business. The architectural stone trims offered in our Cultured Stone® portfolio are meticulously crafted to provide the perfect finishing touch to your project. After all, even the smallest trim piece can play an indispensable role in the larger narrative waiting to unfold.

NATURAL VARIATIONS

PGH™ bricks are made from natural clays, fired at extreme temperatures creating products of enduring colour and character. The natural variation in both clay and the firing process means textures, composition, size and colour including the appearance of flashing, will vary from batch to batch. Often the character created by this variability is the very reason bricks are desirable.

BLENDING AND CLEANING

Blending

It is essential that all bricks be carefully blended from at least three or four different packs/pallets at the time of laying to provide a consistent colour and texture. Your bricklayer is responsible for ensuring an even colour distribution.

Brick Cleaning

Brick cleaning is a specialist trade and should only be undertaken by a professional. The chemicals and high water pressures used can easily damage the product, if not done correctly. Different brick textures and colours often have different cleaning considerations. Dry brushing bricks periodically to remove residual mortar is an effective way to reduce the amount of effort required to clean bricks. Bricks should be cleaned within 2 to 14 days of laying.

Brick Cleaning Guides are available:

pghbricks.com.au

thinkbrick.com.au

Alternatively, please contact PGH™ on 13 15 79 or Think Brick Technical Hotline on 1300 667 617.

Disclaimer: Clay bricks are made from naturally occurring minerals. Variations in colour, texture, and size are natural characteristics of clay products and production variations can occur from batch to batch. Colours shown are indicative only and should not be used for final selection. In assessing colour in the finished product, bricks should be viewed at a distance of 4-6 metres. Products ordered should be chosen from actual samples current at the time of order and are subject to availability. Whilst every effort is made to provide samples, brochures and displays consistent with products delivered to site, they should be viewed as a guide only. Customers should ensure that all delivered products are acceptable, and any concerns about products are notified to PGH Bricks & Pavers™ prior to laying. All warranty claims against product must be made prior to the product being laid. Efflorescence may sometimes appear on bricks. It's a white, salty powder usually from salts in cement and mortar. Fortunately, the powder is completely harmless and will usually weather away with time. You can brush it off, although it may return if the salt and moisture source is still active. **WARNING:** Bricks contain crystalline silica. Cutting or grinding these products creates dust, which may be hazardous and should not be inhaled. Please ensure that when cutting or grinding, an approved mask (respirator) is worn. **Cultured Stone Disclaimer:** Shade variations can occur from batch to batch. Colours shown are indicative only and should not be used for final selection. © Copyright PGH Bricks & Pavers Pty Limited – all rights reserved 2018. PGH™, PGH Bricks & Pavers™ are registered trademarks of PGH Bricks & Pavers Pty Limited in Australia, other countries or both.

Warranty: The brick colours shown in this brochure are an indication only and may be different from the actual product. It is a good idea to confirm the availability and view the latest batch colours at one of our Selection Centres before making your decision, and always check the delivered packs as soon as possible. All warranty claims must be made prior to the product being laid. **Transport & Delivery:** To ensure the safe and timely arrival of your bricks, there are a number of considerations that must be made. Bricks may have been transported several times prior to them arriving on site. During this handling, chipping may occur. This will not affect the performance of the brick. If there is an issue, please contact PGH Bricks & Pavers™ to organise a site meeting prior to laying. For specific details, please contact our Customer Service Centre on 13 15 79. **Terms of Sale:** PGH Bricks & Pavers™ is unable to accept liability for costs incurred as a result of failure or delay in delivery of the product. For a complete copy of our Terms of Sale, please contact a PGH™ Selection Centre for terms and conditions.

BRICK DURABILITY

Salt Attack Resistance

Bricks are commonly classified into two categories for Salt Attack Resistance:

1. **Exposure Grade (EXP)** – the product is suitable for a severe marine or saline environment. Exposure Grade bricks are less susceptible to salt attack. A severe marine environment is defined as: up to 1km from a surf coast or up to 100m from a non-surf coast.
2. **General Purpose (GP)** – the product is suitable for general environmental conditions. These bricks should not be directly exposed to saline environments. For more information, visit thinkbrick.com.au

Solar Absorptance Rating (Basix Rating)

When designing energy efficient buildings, the architects and consulting engineers need to be able to calculate the heat loss or gain of materials used to construct the buildings. This is why building materials are categorised into 3 categories: **Light (L)**, **Medium (M)** and **Dark (D)**. **Light** coloured being a low solar absorptance and **Dark** coloured being a higher solar absorptance.

COLOURS TO CREATE YOUR HOME

PGH™ SELECTION CENTRES

Selecting PGH™ bricks has never been easier. At our large network of Selection Centres we offer many services such as colour scheming, product selection and technical advice. Make an appointment today.
