

### Application to existing mature date palms

Eight trenches (each of 1 metre length X 1 metre depth X 0.3 metre width) are dug, radiating out from palm trunk as shown in below diagram.

Trenches are back filled with normal sand to which 50 kg AustraBlend SuperSorb is added at the rate of 50kg per trench.

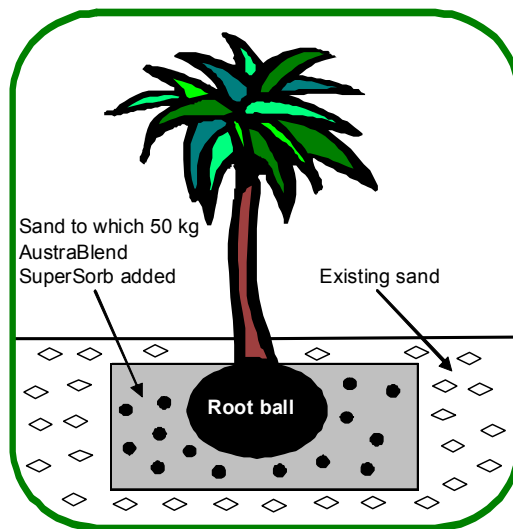

### Cross section of trench

### Application For New Plantings Of Date Palms / Trees

For new plantings of palms back fill area around root ball with sand to which 50kg AustraBlend SuperSorb is mixed.

For new plantings of trees and shrubs back fill area around roots with sand to which 20 – 30kg AustraBlend SuperSorb is mixed.

### Application For Turf Plantings

For turf plantings mix AustraBlend SuperSorb at a rate of 5 – 15% into existing sand to a depth of 10cm. Turf, either by stolon or seed, can then be planted directly over this layer.
