TO LEADING INDUSTRY 4.0 WELDING TECHNOLOGIES

**SPECIAL
LIMITED OFFER!
TRADE IN**

**ANY COMPLETE WELDING SYSTEM
IN WORKING CONDITION**

\$1 PER AMP
OUTPUT*

**400A MIG WELDER =
\$400 DISCOUNT***

**REMEMBER GOVERNMENT
TAX INCENTIVES FINISH
31st DECEMBER 2020**

- ✓ Industry 4.0 digital systems with Lorch Connect big data management
- ✓ Advanced speed processes for GMAW (MIG-MAG) and FCAW delivering up to 30% productivity gains
- ✓ Next generation inverter technology with future proof upgradability
- ✓ Made in Germany

*TERMS & CONDITIONS: Trade-in applicable to any process, **Complete Welding System, in working condition**. Trade-in equipment must be delivered to the participating Lorch distributor. Relevant discount applies to the purchase of any Lorch S, MicorMIG, MicorMIG Pulse, T or V series industrial welding systems. Offer closes 31st December 2020.

LORCH
smart welding

THE NEW BENCHMARK

FOR STRUCTURAL STEEL & GENERAL FABRICATION

- ✓ Industry 4.0 digital system with Lorch Connect big data management
- ✓ Advanced speed processes for GMAW (MIG-MAG) & FCAW delivering up to 30% productivity gains
- ✓ NFC Technology for shop floor quality control
- ✓ Future proof upgradability
- ✓ Extensive range: 300 to 500A, compact & remote, air & water cooled
- ✓ Next generation inverter technology made in Germany

The Lorch MicorMIG and MicorMIG Pulse series set the new standard in welding for structural steel and general fabrication. Fully optimised for Australian and New Zealand conditions, their high efficiency resonance inverter makes these machines the most technologically advanced GMAW (MIG-MAG) and FCAW systems on the planet, further enhanced with the addition of Lorch Wi-Fi Connect technology for big data management. These cutting edge capabilities drive shop floor productivity, efficiency and quality control.

Dependable, robust and simple to operate, these are premium examples of German engineering quality and performance. MicorMIG is the future proof platform for production welding enterprises; an all-rounder for every application that just makes good commercial sense. Listen to what our customers have to say:

Major heavy engineering fabricator Genis Steel SA,
"After reviewing the various brands and technologies we standardised on Lorch, the best welding technology in the world from Germany. The highly efficient MicorMIG 400A and 500A platforms are the perfect all-round machines for structural steel fabrication. They are simple to operate and give us the welding process flexibility combined with perfect welding quality and high productivity all the time".

Vince Manuele, Managing Director SA.
