### TO WHOM IT MAY CONCERN

I wish to state that All Australian All Energy Solutions in the last six months have installed four solar energy complexes on our property comprising 2 x 5kW (5.5) and 2 x 30kW (33) and we couldn't have wished for a better company being Paul, Laurie and Kame to work with. all were rooftop except 1 x 33kW which was built on stands for irrigation.

They bent over backwards for us in every way possible and when a 33kW system was going to interfere with our enterprise they worked with us in erecting the design we wanted to fit in with our farm which Laurie has a photo of.

We had a couple of small issues after installation, and one phone call and they were on our doorstep to rectify it, and they still keep in touch and drop in now and then to check up that all is well.( and a cuppa and chat)

It is really great service in comparison to a lot of stories you hear about other suppliers, one supplier even resorted to threats and abuse when we didn't deal with him.
