Subject: Re: AAES

With the cost of farm electricity on the rise, I decided to attend a QDO Energy Efficiency Day and on hearing Laurie and Paul from All Energy Solutions speak on a range of solar options, we decided to look seriously at solar.

We provided them with our electricity bills and they gave us a no obligation quote on cost and payback periods using conservative Clean Energy Council figures.

We decided to go with 5 x 5kw systems taking advantage of the existing feed-in tariff.

They handled the paperwork from start to finish and the systems were installed quickly and professionally. The five systems have over the winter period been exceeding their quoted power generation figures used in the payback period calculations.

So with solar technology changing all the time, we'd have no hesitation in recommending Australian All Energy Solutions for your solar installations. They have a very strong after sales service focus and explain the solar workings so effectively to us.

Regards,

Paul Roderick
