WHY HAVE AN ATM?

Eliminate the time and expense of processing EFTPOS transactions. It's much quicker to process a cash transaction and there's no fee to pay for the privilege of your patrons spending money with you. Tap and Go is the silent killer for a number of businesses as these transactions are processed as credit card transactions, which increases the processing cost. Dig out your last EFTPOS statement and find out the real cost of providing this service to your patrons!

Your patrons also have the convenience of being able to do a balance enquiry just in case they are not sure how much money they have to access.

In addition to eliminating your EFTPOS fees, we pay you to provide this great service to your patrons in the form of rebates for successful transactions. So you'll save money and make money.

Your customers receive a receipt with their ATM transaction, so there's no disputing what money patrons requested and received. Details of unsuccessful transactions due to wrong pin numbers or insufficient funds are printed on the receipt.

TRITON ARGO 7

The smaller version of the ARGO 12 is ideal when space is an issue. With added PIN security, improved dispenser security, LED indicators and a high security control panel lock the ARGO 7 provides the convenience of cash with an even smaller footprint at just 145cm H x 46cm W x 50cm D. \$6,600 including GST.

TRITON RL

This dual cassette ATM has proven itself in the market for over 20 years. It shares most of its features with the Argo 12 but has a smaller screen and older style shape. At \$7,500 including GST its great value for money.

All prices quoted are ex Brisbane. Freight charges will be quoted at the time of purchase.
