

PUMP RIGHT

**POWER PUMPS
AND ENGINEERING**

CUSTOMISED PUMPING SOLUTIONS

At Power Pumps & Engineering, our experienced team has in-depth knowledge of pumps and pumping systems across a range of applications. We are well positioned to deliver pumping and water treatment solutions in a number of sectors, including domestic, waste and water treatment and food and beverage.

CUSTOMISED PUMPING SOLUTIONS

WHY CHOOSE US?

We will work with you to understand exactly what you need and recommend something to deliver a perfect solution. Using the latest software, our highly experienced staff can design and engineer a range of custom designed pumping systems, or make modifications to suit existing plant to deliver the best results from your pumps.

Whether you are after an off-the-shelf solution, or a custom built solution, we will effectively manage the design and installation of complete site works from civil and mechanical, through to electrical and ensure your project is delivered on time and on budget.

We also have a number of case studies available on our website highlighting examples of our work.

RECENT PROJECTS

Some recent projects that showcase our engineering capability are listed below:

- Containerised water treatment plants and pump sheds including filtration, UV, chemical treatment and water quality data analysis
- Aquifer Storage Recharge (ASR) systems, including bore pump installation and head works
- Single heavy duty motor pump sets
- Skid mounted multiple pump booster sets including variable speed drive, jacking pump and BMS
- Pontoon-mounted pumps
- Wine trolley pumps
- Submersible aerators
