

Pool Piling

We can Dig and Pile your Pool!

Our Principal Operator for pool installations, is a highly experienced Excavator Operator for over 22 years in the housing, pool building and construction industry, being licensed in both NSW and QLD.

Russell brings to the industry a unique service, by doing the excavation and pile installation with the one machine, saving additional delivery and standby costs. As well as offering an all in one process, he also has a generator welder which is permanently mounted on the truck as well as carrying additional pile extensions in case they are required.

Limited access? Tricky project? Give us a call!

Russell Heale Group have completed numerous jobs using limited access machines and barges to deliver equipment. For the more difficult jobs we like to take a look and assess the site first, prior to confirming a quote (inspections can be done Saturday mornings). For more information, general enquiries or an obligation free quote at very competitive rates, send us your plans with the geotechnical report or phone 1300 55 93 75.
