recycle right with ecogroup

We're on a mission to transform the demolition, construction, and landscaping industries by providing a green alternative with groundbreaking benefits for both our customers and the environment.

recycle right with ecogroup

**We've come a long way
since 1991, and we're proud
of our achievements so far.**

But, true to our values, our work is never done! Together as a team, we want to keep learning, innovating, and expanding on what it means to 'recycle right' – including complete reuse, recycling, and upcycling.

Very simply, our vision is to provide a cradle to cradle alternative, reducing waste within the construction and landscaping industries by being the leader in sustainable demolition and recyclable products. In doing so, we'll provide significant cost savings to our customers and minimise our environmental footprint to preserve the planet for future generations. After all, that's what it's all about.

At the core of everything we do, lies a deep commitment to sustainability.

Our History

At EcoGroup, we're all about recycling right.

We do that in a number of ways, with a range of services and products. One thing's for sure though – we're not just another brick in the wall!

We've been around since 1991, when Founder Toby Sail, a professional landscaper and environmentalist, realised the potential of using recycled bricks in landscaping works. Since then, we've come a long way – expanding into sustainable demolition and the supply of various recycled building materials and landscaping products, including crushed brick for sustainable tennis courts, recycled timber garden, and much more.

At the core of everything we do, lies a deep commitment to sustainability.

By maximising salvageable materials and minimising the waste that goes to landfill, we're preserving the environment for generations to come. After all, what's more important than that?

Not ones to rest on our laurels, we're constantly looking for new ways to innovate, recycle, and upcycle – benefiting both our customers and the environment. As a result, we've earned a reputation for:

- Delivering world-class sustainable demolition and excavation services;
- Providing the highest-quality recycled and upcycled products at affordable prices; and
- Surpassing client expectations with our friendly customer service.

We have a valued, multi-disciplined team in excess of 45 people, all of whom are dedicated to serving our customers and achieving our vision. Together, we're transforming the demolition, construction, and landscaping industries by providing a green alternative. We hope you'll join us on the journey.

Doing things differently
takes real dedication.
These fundamental values
form the backbone of
everything we do, keeping
us focused on our vision.

Our Values

Innovation

We believe there's always room to improve, and new ideas to bring to life. Innovation is our lifeblood, so we're constantly questioning the status quo and inventing new products and services to make life better for our customers and the environment.

Customer empathy

We take the time to understand our customers' needs, and then we leverage our broad experience and expertise to help them achieve the best possible result. Our customers value our friendliness, dependability, knowledge, and passion.

Environmental sustainability

As well as caring about our customers, we care deeply for our planet. After all, that's why we started in the first place! Everything we do is designed to do no harm, preserving our precious Earth for generations to come.

Positive change

No matter the challenge, we believe where there's a will there's a way! Working together as a team, we use our problem-solving skills and can-do attitude to invent new solutions that make a positive change to the way we recycle.

Team work

We can't do it alone, and neither can you. We consider our valued staff members and our customers to be one big team – all working together to recycle right and preserve our planet.

"By utilising bricks supplied by EcoGroup, I was able to construct a period home which ensured an authentic and quality finish."

Michael Robinson
Principal, Bell Real Estate

Our Services

Demolition Excavation Site remediation

Sustainable demolition

We're proud to be Australia's first green demolisher, minimising waste to landfill by deliberately and delicately removing all salvageable material before razing a structure. In doing so, we deliver benefits for both the environment and your back pocket.

Excavation

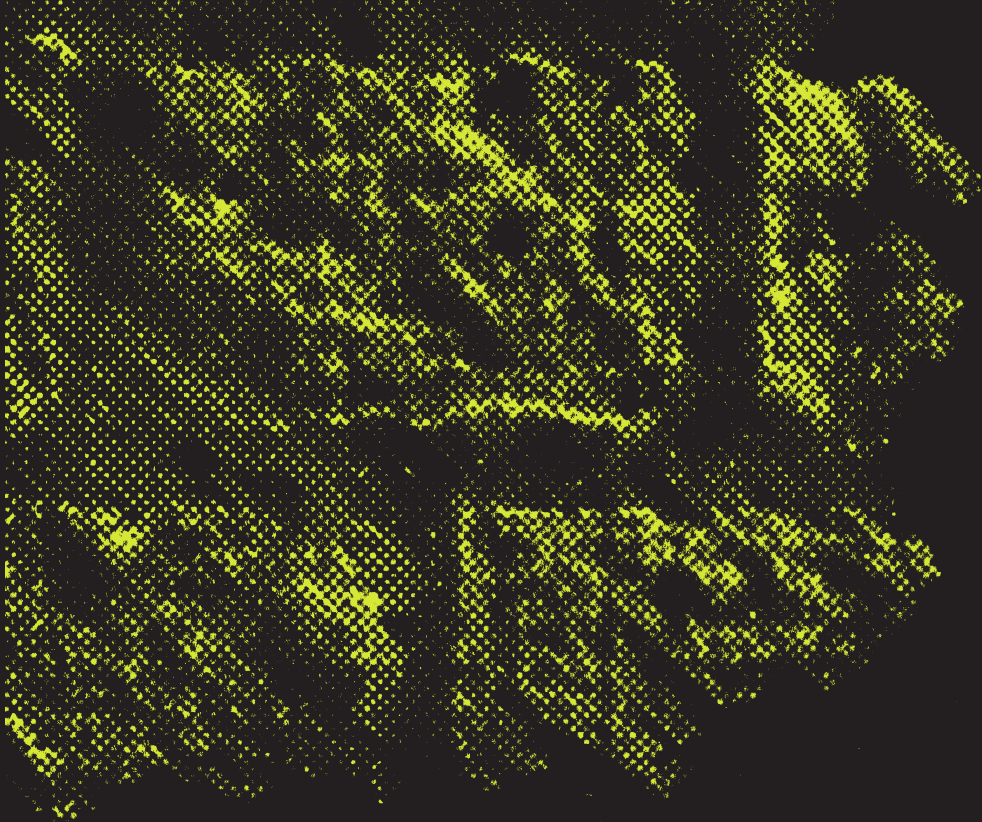

If only excavation was as simple as digging a big hole! We provide excavation services for commercial, industrial and domestic projects as a standalone service or in combination with our demolition service for significant cost savings. Using the latest equipment, we excavate safely and efficiently.

Site remediation

Scratching your head and wondering what on earth site remediation is? You're not alone! Very simply, site remediation is the process of removing contaminants from the ground. We offer a specialised service: determining if you have contaminants, where they're located, and how to move forward for a cost-effective and practical outcome.

Brick Products

“Our clients have been extremely happy with the look of bricks purchased from EcoGroup, it was just what they wanted to create the heritage feel for their unit site development.”

Wal Phillips
Director Waltara Homes

Recycled bricks and pavers

We’re loud and proud about our love for recycled bricks. Why? Because they’re 20% cheaper than new bricks, preserve the environment by reducing waste to landfill and carbon emissions, and provide an immediate patina of age and charm. So, it’s no surprise that we’re Australia’s leading supplier. Whether you’re building, renovating, or repairing, our extensive range means we’ll have the right bricks for you – and our unique brick-cleaning process guarantees they’ll look as good as new. For landscaping projects, we also have a vast range of recycled pavers.

Eco Toppings

Eco Toppings is a richly-coloured, high-end decorative product used for landscaping. Ideal for pathways, driveways, bike tracks, and landscaping features, it compacts to a smooth yet permeable surface. Sustainably made from 100% recycled bricks, it won’t blow away, provides good traction, is easy to clean, won’t fade, allows water to seep into the earth, and has no chemical effect on soil.

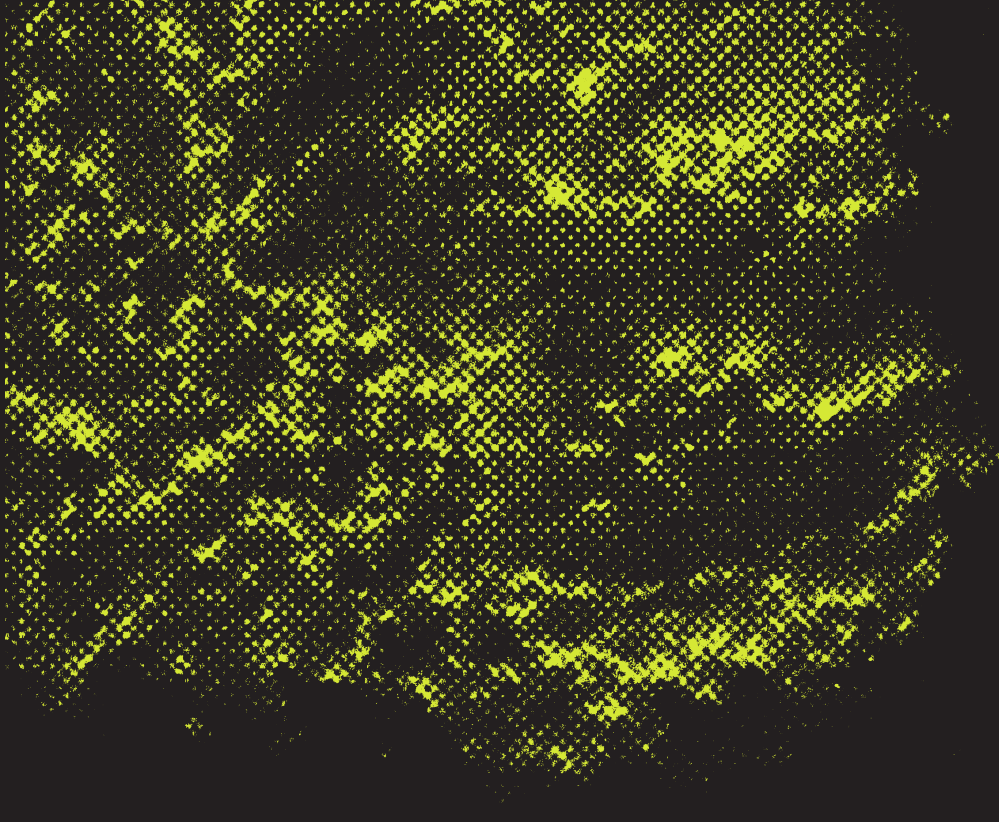

Available sizes: 2.5-10mm, 2.5-20mm, 20mm minus, 5-10mm, 10-14mm, 14-20mm

Red Porous Crushed Brick

Our red porous crushed brick (otherwise known as red brick dust) is crushed to 2.5mm, and is ideal for surfacing clay tennis courts and baseball diamonds. Crushed from 100% red recycled bricks, it’s a great environmentally-friendly option for club owners and sports fans. Our red porous crushed brick comes in 1m3 bulk bags, 25kg bags, or loose by the cubic metre.

Timber Products

“Efficient, flexible and accommodating. Completed the demolition work as agreed and in a timely manner with a friendly crew.”

Philip Knight
Ecovantage

Eco Mulch

Eco Mulch is an environmentally-friendly product for your garden, made from 100% recycled timber salvaged from Australian demolition sites. In addition to its clear environmental benefits, Eco Mulch improves soil structure by aiding moisture retention, helps control weeds as it contains no weed seed, will not blow away due to its high density, and is compact to store and use. Eco Mulch is provided loose by the cubic metre

Our Clients

Get in touch

“EcoGroup consistently provides us with excellent service, whether it be for demolition works or product selection. Works are carried out efficiently, safely and professionally. The team are highly skilled and knowledgeable.”

Tony Lewis
Director, Visual Builders

ecogroup | recycle right

We’ve worked with Architects, Builders, Landscapers, and DIY Home Renovators on a range of exciting, high-profile projects.

Here’s some you might recognise:

- Landscape toppings at Bunurong Memorial Park
- Demolition works on season 12 of The Block
- Removal of contaminated materials at Cabrini Hospital
- Landscape toppings at Manor Lakes Estate, Wyndham Vale
- Recycled bricks at Swinburne University
- Recycled bricks at Deakin University
- Tennis court toppings at Mornington Tennis Club
- Various building materials for Artist, Designer, and Environmentalist, Joost Bakker

We’re well on our way to achieving our vision, but we need your help. It’s never too late to start recycling right!

To engage our services, purchase our products, or simply have a chat and find out more, please get in touch. We’d love to hear from you.
