

HCS 360° PLUS

Electrostatic Disinfecting Service

We care about clean!

What is HCS 360° PLUS Electrostatic Disinfecting?

Electrostatic disinfecting spray is the process of spraying an electrostatically charged disinfectant onto surfaces and objects. Electrostatic spraying such as HCS 360° PLUS uses a specialized solution that is combined with air and atomized by an electrode inside the sprayer. Subsequently, the spray contains positively charged particles that aggressively adhere to surfaces and objects. Because the particles in the spray are positively charged, they completely coat 360° of anything it comes in contact with.

How can HCS 360° PLUS help you?

HCS 360° PLUS electrostatic disinfection service sanitizes and disinfects quickly and efficiently with the most thorough coverage available. Using Hypochlorous disinfectant, this new technology offers a hospital-grade cleaning that is also 99.9% effective at combating viruses including COVID-19, influenza and more as per Health Canada's recommendation.

Who can benefit from HCS 360° PLUS electrostatic disinfecting service?
