

WINDOWS 7 AND SERVER END OF LIFE: DON'T ASSUME, CHECK NOW

- X** NO SECURITY
- X** NO UPDATES
- X** NO COMPLIANCE

Windows 7

Windows Server 2008

Exchange Server 2010

CHECK NOW, PLAN FOR ANY NECESSARY UPGRADES

Microsoft are urging all businesses using Windows 7 operating systems and/or the following server operating systems to upgrade to newer hardware and/or software (such as Windows Server 2019) by - **January 14, 2020**.

With no support from Microsoft beyond this date, failure to upgrade may leave your machines insecure, glitchy, and incapable of running certain software. Upgrading to a newer system could lead to better performance and productivity for your business, and will improve the security of your network.

END OF LIFE IN JANUARY 2020

- Windows 7 workstations, including those acting as servers.
- Windows Server 2008, including 2008 R2.
- Windows Small Business Server 2008.
- Windows Small Business Server 2011.
- Microsoft Exchange Server 2010.

WINDOWS 7 AND SERVER END OF LIFE: DON'T ASSUME, CHECK NOW

Avoid Wasting Time and Money - Plan Early and Prepare Your Business

WHAT'S THE RISK OF NOT UPGRADING?

- **Security Vulnerabilities.** With no more security updates, older systems are more susceptible to malicious attacks.
- **Data Security and Non-Compliance.** By using an older operating system, you could be putting your customers and business reputation at risk.
- **Software Incompatibilities.** Many software products will no longer be compatible with older systems.
- **No Support from Microsoft.** No more help or technical assistance for older operating systems.
- **Higher Operating Costs.** For maintaining and troubleshooting legacy software, and the possible downtime for your business.

WHAT YOU SHOULD DO:

- **Contact Loyal I.T. Solutions.** We can explain further about the risks of using non-supported operating systems, and what changes may be required to your current I.T. infrastructure. **Even if you recently purchased a server, your business may still be affected.**
- Get your systems checked sooner rather than later, to leave plenty of time to plan and implement infrastructure changes.
- If you need to upgrade any equipment or software, start planning now to get in this financial year's 'instant asset write-off'.
- Avoid a last-minute panic at the end of 2019 when demand will be high.
- If you aren't sure whether your current machines and servers are affected, please contact Loyal I.T. Solutions and we can help provide this information.
