6.35mm	1/4"
8.00mm	5/16"
11.1mm	7/16"
12.7mm	1/2"
15.88mm	5/8"
25.4mm	1"
1 kg	2.2 lb

Load Capacity Notes: ■ 90A & Solid Rotacaster wheels have a maximum **Static Load Capacity** of 50kg. ■ **Lateral Load Capacity** refers to the maximum load capacity of each wheel to travel directly sideways without radial head contact. ■ The **Dynamic Load Capacity** (while in motion) ranges between the maximum **Static Load Capacity** and the **Lateral Load Capacity** and varies proportionally to speed of the wheel travelling in its primary direction.

* Single wheels must be combined with an adjacent wheel indexed to form a continuous circular circumference - load capacity is based on two adjacent single wheels.
