Vaccination Policy for Ashridge Cattery and Kennels.

Dogs:

All dogs must be currently vaccinated or have been Titer Tested* and shown to have sufficient natural immunity to board safely. Vaccinations accepted are:

C 3 : C 4 : C 5 or Triennial C 3 (Three yearly vaccine)

Cats:

All cats must be currently vaccinated or have been Titer Tested* and shown to have sufficient natural immunity to board safely. Vaccinations accepted are:

FE 3: FE 4: FE 5

Vaccinations must be completed a minimum of two weeks before admittance to Ashridge Cattery and Kennels.

***Titer Testing:**

Some pets may experience a bad, or occasionally, an allergic reaction to a vaccine. Some vets may then suggest that the client should have their pet Titer Tested prior to boarding.

A Titer Test is a blood test that measures the presence and level of antibodies against a particular disease, which can provide evidence of current or past infection or protection provided by a vaccine.

If the results show a suitable level of protection, then a pet can board safely. This is accepted by us, as we had a dog of our own who had a severe reaction to his 16 weeks vaccine as a pup, was titer tested annually thereafter, and lived to 16 years without any problems, and his annual antibody levels remained high!

HELP! Just noticed your Pet's vaccinations are not up to date, or fall due whilst on holidays and it's close to your pet's Ashridge visit?

Please! Don't rush off to get your pet re-vaccinated. Call Linda first 0419 924 280.
