

If you're ready to elevate your hydrogen energy initiatives with cutting-edge solutions.

J-Power Latrobe Valley Facility – part of the Hydrogen Energy Supply Chain (HESC) project.

What we offer

- Pilot plant operation & maintenance
- Commissioning expertise (pilot & commercial)
- Detailed maintenance documentation
- Precise laboratory scale testing
- Tailored process design & modelling
- Thorough risk assessments (HAZOP/HAZID)
- Accurate hydrogen purity analysis (AS 14687)
- Environmental impact measurement
- Techno-economic evaluations
- Materials compatibility assessment
- Component failure investigations

Industry Challenges

Companies working in the hydrogen industry face many challenges: from economic barriers hindering production to interpreting government policies and regulations, to market uncertainties and demanding specialised processes.

Our Expert Team

Our team provides solutions to the challenges faced by our hydrogen industry clients based on our in-house expertise and extensive experience working on hydrogen-related projects. We specialise in process development, risk assessments, laboratory analysis, contract management, site supervision, project coordination, and commissioning.
