

QUALITY • INNOVATION • STYLE

with exceptional service & outstanding communication

When working with Dynamic Pool Designs you will experience exceptional customer service from design through to the planning stage, from approvals through to construction and it does not finish at final handover, we will continue to support you as a new pool owner and beyond.

QUOTATION & DESIGN

RESEARCHING YOUR VISION, SITE CONDITIONS & BUDGET

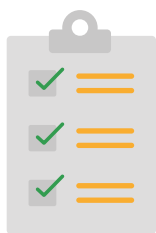

INITIAL ENQUIRY & PRICE GUIDE

Congratulations, you have taken the first steps to contact us and discuss your new swimming pool project! - We are excited to be on this journey with you and want to help you with all of the information you need to make the right decision for your project.

During the initial stage we provide you with this information pack about our company, giving you some background information on what type of builder we are, some of the popular features we provide and lots of pretty pictures to help get your idea's flowing.

We will also give you a "price guide" outlining some rough estimations of what it might cost to build the type of pool you have in mind!

Take the time to have a look over the details and if you think, we just might be a match made in backyard heaven - Jump to the next step and give us a call.

ONSITE INVESTIGATION & MEASURE

YES - Give us a Shout! - If you are ready to jump to the next stage, now that you have considered the information and price guide, you have visited our website and stalked us on social media!

Now is a great time to get back in contact with us and book an onsite investigation to get the ball rolling. If you have site plans for your meeting this will be really helpful, call your local council if you don't have a copy.

We will visit your site, take notes, photos and talk to you in detail about your ideas and project design.

Once we have considered all of the elements together with your site conditions we can then provide you with a specific proposal for your project.

PROPOSAL & OPTIONAL FEATURES

After we have completed the investigation stage and based on our discussions with you, we will provide you with a project proposal. This will include all of your project details and also provide you with many of the optional features available to you. At this stage we can work with you to find the perfect balance between your project vision, site conditions, optional features and budget.

DESIGN PHASE

The design phase is quite an exciting and critical stage in your planning, this is where we tweak your design and selections.

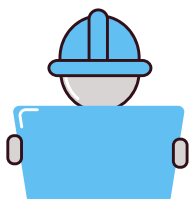

It's a delicate balance but this is where we work our magic, making sure you can have the best quality build with our high level of service and years of expertise. From internal bench and steps planning, lights, pool plumbing, external features and fencing. This is a great stage to request our 3D planning service to fine tune your design and your proposal will be updated to reflect your selections.

Once you are ready to hit the GO Button we proceed to the final paperwork and council approvals!

APPROVALS, SELECTIONS & PRE-CONSTRUCTION

With construction a firm reality and only moments away we arrange for all of the paperwork to be in order, submit to the certifier and local authorities for the relevant approvals.

You will be invited into our showroom to choose the style elements for your project, like coping tiles, waterline tiles, internal pebblecrete colours and more.

Our team will also arrange a pre-construction meeting with you to complete our final checks, measures and order the materials and services we need to start construction.

Don't worry, we are here to help you along the entire way! If you have any questions just give us a call.

DESIGN FOCUSED

WHAT'S IMPORTANT TO YOU? - CREATING YOUR VISION

It's your project and your home, we are here to help turn your vision into reality, it all starts with you!

At Dynamic Pool Designs we will take time to understand your lifestyle, we will design and deliver an outdoor oasis that will add value to both your family lifestyle and your home.

We can assist you with the perfect positioning and layout to suit your site, provide you with the pro's and con's on different design choices and how they will impact construction complexity and budget.

Now is the time to have a think out the styles and designs you love, but don't worry, if you don't have a vision and need some ideas we can help you with that too. Instagram and Pinterest are a great place to start and you will usually find a style or pool area you like.

We want to learn about you and how you would like to use your outdoor space then we will build your project to the highest quality.

Before we start it's a great idea to have a think about the following pool design points;

- Do you want a family friendly pool for kids/grandkids, suitable for babies and/or teenagers?
- Do you want to relax and entertain inside your pool, maybe large benches and spa jets might be an option?
- Do you love swimming for fitness and health, look at longer length and smaller widths with step positioning away from the swim lane area?
- What space will be required in the pool area, lounges, slides, beanbags? Do you like to sit in the sun? Need space for a pergola, umbrella or want an area to dine directly by the pool?
- Do you need to consider pool equipment / toys storage and filtration housing/soundproofing? Kids have lots of pool toys! - Where are these going to be stored?
- Is your pool position viewable from your house? It's best to have your pool visible from your main family areas of the house. Trust us you will use it much more and enjoy it all year round.
- Would you love an entertaining space outside the pool area?. Designing the pool surrounds is best to be done at the same time to create symmetry in your design. Construction can always happen in stages, but you will have the vision!
- Consider some other options to add to your space, like waterfeatures / sunpods / spa-jets / pool-slides / pergolas these items help to add design interest to your pool area.

"Consider your outdoor space in it's entirety"

HEALTH AWARE

WHAT ARE THE HEALTH BENEFITS?

Having a pool in your backyard is becoming an essential item for families, as well as being lots of fun, swimming is a great way to keep fit and healthy with many physical and mental health benefits that you can continue for a lifetime.

We believe, after the pool design, selecting your pool sanitation is the most important part of your pool project.

With many advanced technologies in equipment over the last 10 years the swimming pool industry has benefited from more natural solutions rather than traditional chlorine and salt water pools.

Consider a more natural alternative with combining the health benefits of magnesium-based pool filtration systems that allow you to swim in soft, soothing water without any odour or chemicals. (Choose one that's 100% natural and made without any synthetic ingredients or processing)

"Ozone systems are the smart,
environmentally friendly choice
for pools and spas"

For the highest levels of purification and crystal clear, clean water look out for a system that includes the Ozone-Oxygen process. Ozone is a naturally occurring sanitiser that attacks contaminant molecules in your pool. It's more powerful than chlorine and because it's natural, it doesn't make your eyes red or your skin itchy. You don't even need a shower afterwards; it's that gentle.

[Click here for more info on the benefits of choosing ozone and magnesium sanitised pools](#)

SERVICE & QUALITY

THE CORE VALUES OF OUR BUSINESS

Building a pool is usually the next biggest project after building your home, and for some people it's the largest project they have ever done.

We know at times it can get confusing with gaining building approvals and navigating all of the construction lingo, that's why our dedicated and experienced staff are here to help you the entire way through your project. We are a close knit team of friendly, easy going professionals who all have the same goal, to make sure you have the best experience from beginning to swimming!

Our core business values have been designed around outstanding service in every area of our business and providing exceptional quality in all we do. Everyday our staff have these values at the forefront of their minds and take this with them throughout the day to every job they attend.

We have many loyal and valued relationships with our trades, suppliers and contractors, they all provide us with a high level of support and high quality work. As a company we are always looking for ways to improve our processes and provide the best quality and innovative products that the industry has to offer.

At final handover we are here for you with hands on demonstrations and links to our instructional videos for you to research in your own time.

Don't forget our dedicated after sales service team can be called on to assist you onsite and available to regularly take care of your pool.

We know that communication is key to a great working relationship, our dedicated team will project manage your pool ensuring you are informed every step of the way.

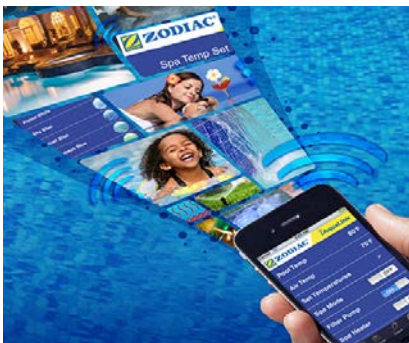

OUR TOP PICKS FOR POOL CUSTOMISATION

We have many options available to you to custom design and automate your pool as little or as much as you like. You can look through the optional upgrades and discuss with a Dynamic Pool Designs staff member to see what other options will work for you and your budget best.

We believe that adding value to your pool and choosing the right products the first time will never be regretted and will increase your overall enjoyment of using and caring for your pool for years to come.

AUTOMATION

Automated pool systems have a wide range of benefits. They give you the power to manage all pool and spa equipment, waterfeatures, backyard lighting and more from anywhere in the world. Plus you can have a variety of control panels or remote controls at your home. You can adjust scheduled timers, water temperature, change the light colours and turn your spa jets on with your phone or remote control..

SELF CLEANING

Automatic In-Floor pool cleaning and circulation systems are built into your pool during construction and is specially engineered to clean your entire pool including floors, steps, benches and spas on a timer everyday. Pop-up nozzles deliver a high pressure jet of water that directs debris to the central drain, where it is then removed and sent to the canister, which is positioned for easy deck side removal.

POOL HEATING

Even living in one of the warmer regions in Australia, you still need a pool heating system. The water might reach a warm temperature at the height of summer, but during the winter, autumn and spring months it could easily be 15-20 degrees cooler than this, Especially if your pool is in the shade during the middle of the day. Enjoy your pool for most of the year, not just when the weather is at its hottest.

MINERALSWIM

MineralSwim is a 100% natural swimming system that offers the clearest, safest and healthiest water for your pool. Combining 100% DeadSea minerals with ozone purification, this system provides crystal-clear, healthy water that's soft on your skin. With before and after swim care from AHAVA – one of the worlds greatest skincare brands – you'll enjoy an exceptional swimming experience in and out of the water.

ROBOTICS

With a Dolphin robotic pool cleaner you need less chemicals for your pool, simply because you don't use up as much water with backwashes. Robots operate and filter completely independent of the pools main filtration system – as a result the water is filtered in the pool. Let the Dolphin do the work for you, relax and enjoy your pool with full confidence that it is completely clean and hygienic.

INTERNAL TILING

Lining a pool with tiles has long been regarded as a luxury and premium finish for swimming pools. Tiles are extremely durable and offer almost limitless design and colour choices, they add a depth and intensity of colour that cannot be achieved with pebblecrete and they look fantastic. Tiles are easy to maintain and most importantly are gentle on your feet and swimmers due to their silky smoothness.

SWIM-JETS

Installing a SwimJet is fun for the entire family. Spend hours testing your strength and playing games against the current. Boost your workout potential dramatically for faster calorie burning and increased muscle strengthening with a SwimJet. Fun for everyone, and gives swimmers more versatility with swim training, if you can only build a small pool in your backyard.

AUTO COVERS

Swimroll is the ultimate pool cover solution. Remco Swimroll Automatic Pool Covers provide an impenetrable surface, ensuring outstanding pool safety. Leaves, debris and dirt are prevented from entering the pool water, keeping your pool beautifully clean. Swimroll will eliminate the evaporation of heating, chemicals and water by approximately 80%, saving you time and money.

GLASS PEBBLE

Upgrading to a full Glass pebblecrete finish is a premium option but more cost effective than fully tiling your pool, and still proves you will a smoother pool surface than standard pebblecrete, it consists of small glass pebbles with pure white cement and with many colours and mixes available, you can be sure to find a colour mix that suits your pool colour preference.

WATERLINE & STEPS

Waterline tiling adds a personal element of design and style to your pool, it can create a polished look to your final design. Tiling the benches and steps is also on-trend at the moment. Tiles enhance the look of your pool, add additional colour and will reduce your ongoing maintenance as the surface can be easily wiped clean.

POOLSCAPING

We know a pool is not the complete picture, you need the extras to make the outdoor space functional and enjoyable for everyone. Not to mention the WOW factor for you home! During the design stage consider, extended tiling, pool decking, pool high walls, water features, artificial grass, garden beds, planter boxes, garden lighting and lounging areas to create your unique space.

SLIDES & RAILS

Pool hand rails and ladders are useful in so many ways for the younger and older generations using the pool and is a great safety feature to consider. On the other hand for the little daredevils you cannot go wrong with a pool slide to keep the kids and the entire neighbourhood entertained for many hours every weekend, its the ultimate pool party entertainer!

WATER FEATURES

Waterfeatures add a great feature to your pool and garden, they come in many styles and the possibilities are only limited to your imagination. There are the traditional shear descent blades, water walls, wet decks, bowls, spouts, cascading rain curtains. Available to be turned on and off when it suits you or set up on automatic timers the choice is yours.

SOLAR HEATING

With a solar pool heating system, water is pumped from the pool through a multi tube solar collector, which is generally mounted on your house roof and then back to the pool. As the water passes through the solar collector it is warmed by the sun. It can be controlled either manually or automatically with a digital controller which automatically directs water to the roof when there is both sufficient sunshine and the water temp requires it.

POOL FENCING

An absolute necessity for every pool, there is no getting around it! We have a huge range of options, including Frameless Glass, Semi Frameless Glass Aluminium, timber post styles and vertical cables. Depending on your site you may also need custom made panels to suit a slope or span a retaining wall. Talk to us about the options and how we can make sure that your pool is safe, certified and stylish.

POOL WINDOWS

If you want to make a bold statement with your design, then choosing one of our see-through pool walls or pool windows will certainly make a statement that can't be ignored! If your pool is out of the ground it's a great option to soften and create extra interest and of course hours of fun with the kids "Look at Me!"

INFINITY EDGES

Complimenting and framing the outlook and background of your property is just as important as the pool design and both should be considered when planning the project.

An infinity wet edge or infinity dry edge are wonderful options to draw the eye over your pool and towards the view, creating a perfect even flow.

SPAS

The possibilities are endless when it comes to Spa design and function, with so many options on how that can integrate with your pool design. If you like to sit and relax with bubbles in the water and in your hand, it might be worth considering a spa with your pool design or just adding spa jets to your pool bench is always an option too!

POOL LIGHTING

Lighting is a key area that is often overlooked and missed during the pool planning. If your entertaining or enjoying the outdoors at night, lighting your pool and outdoor area is the best way to showcase your backyard and create the WOW factor with your investment. When your backyard lights up at night it's like a completely different area to the day time.

ZERO ENTRY POOLS

If your style is anything but traditional for your backyard pool, a zero entry also known as a beach entry (with no sand) could be something you might like to entertain. If you have the space and young children there are lots of advantages to this design.

POOL LOUNGERS

Close your eyes and you could be poolside at a 5-star resort, open your eyes and you are in the comfort of your own backyard, lounging by your very own pool and either reading a book or chatting with friends while you watch over your family, poolside and in comfort!

We have no hesitation recommending Dynamic Pools Designs to friends and potential pool owners and we would definitely use them again.

The Squires Family, NSW

We had limited knowledge of pools and we felt in good hands with the Dynamic Pool Designs team. The aftercare has been amazing, we have needed some hand holding and the guys are always around in no time to help J.Owen, NSW

We chose Dynamic Pool Designs over other competitors initially due to their professional presentation. What a good choice we made, they were fantastic to deal with, as we have never had a pool previously we were asking many questions and they always explained exactly what was happening and why to each and every query. D.Bannister, NSW

Couldn't be happier with the finished product! Excellent experience, designing and building our custom pool with the Dynamic Pool Designs team. We were kept up to date through the whole process and couldn't be happier with the finished product! M.Luff NSW

From the time of quoting, throughout design and construction, Gavin and his team were nothing short of professional. Communication was clear, and contacting the team was easy. The finished product is outstanding, and we could not be happier with the job. I would highly recommend Dynamic Pool Designs to friends and family. Mr I. Black QLD

Dynamic installed our 10m x 5m magnesium pool and I could not be happier with the result. The magnesium feels amazing on your skin. Dynamic came in prior to building and poured the shell so building could commence. They worked seamlessly with our builders and landscapers and delivered an incredible pool. Would highly recommend. K.Beattie NSW

TEAMWORK MAKES THE DREAM WORK!

ALL THANKS TO OUR
