Brisbane

Leading in a Sustainment Environment

-The People Factor

AA&S - Topics Covered:

Mechanical Systems
Non-Destructive Testing
Hazardous substances
Hydraulics and pneumatics
Condition Monitoring
Cost of Ownership
Knowledge growth
Collaborative relationships
Software supportability
Logistics systems
Avionics
HUMS
Corrosion
Publications
Propulsion

Obsolescence
Counterfeit Parts
Crashworthiness
Oxygen Systems
Ageing of materials
Structures and Airframe
Supply chain design
Electrical wiring systems
Integrity Programs
Support Equipment
Unmanned Aerial Systems
Workforce capability
Leadership
Cyber Security
Additive Manufacturing

Trust and Respect

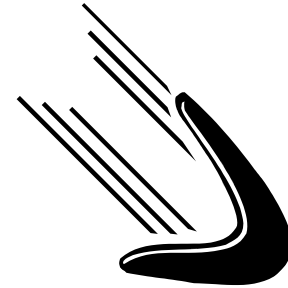

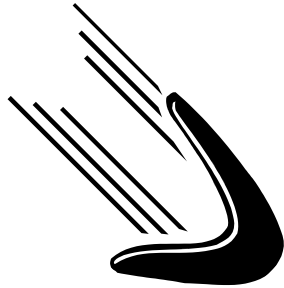

....Work in both directions!

Leading in a Sustainment Environment

-The People Factor

*....but what happens when trust
breaks down?*

Leading in a Sustainment Environment

-The People Factor

A Frequently Asked Question...

You're teaching us to be good leaders, but what if the leadership problem is being caused at levels above us?

Leading in a Sustainment Environment

-The People Factor

*How does good leadership improve
technical output?*

- Building and retaining knowledge
- Cooperation and collaboration

Leading in a Sustainment Environment

-The People Factor

"One of the secrets of life is that those things which are most worth the doing, are the things that we do for others".

Lewis Carroll
