

Veterinary Specialist Services perform thousands of abdominal surgeries each year. These surgeries include procedures such as foreign body removal, intestinal resection and anastomosis, cholecystectomy (removal of the gall bladder), liver lobectomy, partial pancreatectomy and genitourinary procedures among others. We pride ourselves on our meticulous, gentle surgical technique, thorough investigation of all organs, advanced anaesthetic monitoring tools and pain-free recovery.

Follow the QR code to our dedicated webpage on 'Abdominal Surgery at VSS'.

This webpage also contains a video of one of our specialist surgeons talking more about the process of abdominal surgery at VSS.

Information about payment options can be found here:

A patient's journey through our hospital
