

Veterinary Specialist Services are world leaders in the field of brachycephalic airway surgery. We have extensively published in this field and are continuously looking for ways to reduce complications and improve outcomes.

Airway surgery is complex, and the recovery process is critical. We believe that patients should be monitored intensively in hospital for 24 hours after surgery to reduce any risk.

Follow the QR code to our dedicated airway surgery web-page.

One of the pioneers of Brachycephalic research at VSS was Adjunct Professor Philip Moses. Much of how the VSS surgeons manage these cases is inspired by Philip's work, research and training over 20 years. Many of our VSS nursing team have been trained by Philip in the specific management of these cases in the post-operative period.

Information about our multiple payment options can be found here:

A patient's journey through our hospital

Our Locations

Underwood

1 Lexington Road,
Underwood QLD 4119

Jindalee

24/34 Goggs Road,
Jindalee QLD 4074

Carrara

104 Eastlake Street,
Carrara QLD 4211

Bookings:

Please call 1800 442 648 to book your appointment with one of our specialists.
