

VSS has been performing cruciate ligament surgery for over 20 years, with excellent outcomes. We also offer arthroscopic (minimally invasive) treatment options.

There is no one size fits all treatment option, which is why we recommend an experienced specialist consultation. At the consultation, your surgeon will discuss the various options once they have examined your pet, their stifle (knee) and their individual gait. We also pride ourselves on advanced anaesthetic monitoring, individualised pain management, stress-free hospitalisation and clear, comprehensive discharge instructions for owners post-operatively.

Follow the QR code to our dedicated webpage, where you can find information on:

- Cruciate ligament disease
- Surgical repair options
- A video outlining the process of referral for a cruciate ligament surgery, including what to expect at your consultation and information about aftercare
- A video about arthroscopy (minimally invasive joint examination) at VSS.

Information about our multiple payment options can be found here:
