

**Veterinary Specialist Services perform hundreds of spinal surgical procedures each year.** One of the more common procedures we perform is hemilaminectomy, used to treat pets with intervertebral disc herniations.

What we pride ourselves on at VSS with our spinal patients, is careful individual neurological examination, meticulous surgical technique with magnification, advanced anaesthetic monitoring, 24 hour care, pain-free recovery, stress-free hospitalisation and clear instructions for owner care at home.

**Follow the QR Code to our dedicated webpage on 'Spinal Surgery at VSS'.**

This webpage also contains a video of one of our specialist surgeons talking more about the process of spinal surgery at VSS. It also provides detailed information on intervertebral disc disease.

**Information about our multiple payment options can be found here:**
