

Veterinary Specialist Services are happy to be able to offer many minimally invasive procedures including thoracoscopic surgery.

Thoracoscopic surgery involves the placement of a small portal into the thorax which allows placement of instruments and a camera to perform various procedures within the thorax.

A common thoracoscopic procedure we perform is thoracoscopic pericardectomy for pericardial effusion.

Follow the QR code to our dedicated webpage on 'Thoracoscopic Surgery at VSS'.

This webpage also contains a video of one of our specialist surgeons talking more about the process of thoracoscopic surgery at VSS.

Information about our multiple payment options can be found here:
