WHO WE ARE

OUR STORY

Synthetic Grass & Rubber Surfaces Australia Pty Ltd has earned a reputation as one of the leading synthetic grass and rubber wetpour suppliers in Australia. This reputation has been built on our high quality products, professionalism, on time installation and care throughout and after the projects completion.

For more than 30 years' our Managing Director, Mark Cunningham and his team, have been working to bring you the best synthetic grass and rubber solutions for your safety, sporting and leisure requirements. Our friendly staff ensure a smooth transition from onsite consultation and installation, to advising you on the care and maintenance of your playground, sports field or backyard lawn. They have many years' combined experience providing prompt and efficient service to deliver on time and on budget.

Our Installers are long term, fully qualified and accredited. They bring their experience, skill and professionalism to every job.

Our range of synthetic grass is ideal for the Australian climate. To you, it means no more watering, weeding or mowing. It allows you to keep your sporting area, home or playground looking its very best year round with minimal maintenance.

We are proud to say our rubber surfaces are used extensively in schools, child care centres and playground areas. They are non-toxic, anti-slip and offer a soft fall surface that complies with the Australian Standard ASNZ 4422:1996.

At Synthetic Grass & Rubber Surfaces we provide a safe and exciting play environment using bright colours and unique designs - even 3D animals and shapes!

For more information on how we can help you with your surfacing needs email us at sales@syntheticgrass.com.au or give us a call on **02 9986 1133**.

- Specialists in synthetic grass and rubber wetpour cleaning
- Advise on ongoing maintenance

Repair & Maintenance

- Repair work for both synthetic grass and rubber wetpour surfaces
- Surface rejuvenation for older installations
- A customised maintenance programme devised and carried out by our staff

SOFT FALL SAFETY SURFACE

SAFE AND FUN PLAYGROUNDS

A soft fall surface is designed to absorb impact from falls and protect against injury in a playground environment. It consists of a dual layer structure - the wear layer which is the visual surface and the underneath layer is the shock absorbing layer that is made from a recycled rubber (see image below). Each piece of playground equipment will have its own free fall height measure and its own soft fall perimeter.

Playground manufacturers may stipulate the soft fall required. If not, we are able to calculate the necessary requirements and guarantee the surface's compliance.

Wear Layers

Where no playground equipment has been installed, wear layers using rubber wetpour can be used in place of a dual layer system.

Our synthetic grass and rubber soft fall systems conform to the Australian Standard ASNZ4422:1996 and are certified soft fall surfaces. Following installation, we will issue a Certificate of Compliance.

SYNTHETIC GRASS

FOR A WIDE RANGE OF SPORTING, RECREATIONAL & LEISURE SURFACES

Synthetic Grass and Rubber Surfaces provide a wide range of sporting and recreational surfaces. Whether it be multi-purpose courts, soccer fields, lawn bowls, golf greens, cricket pitches or indoor gym surfaces, we aim to best suit your needs. The possibilities are endless!

Synthetic grass is easy on the joints, while not as expensive as a cushioned surface. The resistant surface provides an optimum playing surface without maintenance. Periodic grooming is all that is required to keep the court in top form.

The polyethylene synthetic grass is the higher quality grass that guarantees excellent playing conditions and is exceptionally resistant to matting. In terms of slipping, this surface is the safest, ensuring minimal damage to the skin. The polyethylene includes a 10 year manufacturers UV degradation warranty and is 50% less abrasive than the standard polypropylene.

OUR PLAYGROUND SAFETY SURFACING;

- Offers a cost effective safety solution
- Creates a safe and stimulating learning environment
- Encourages play and physical activity
- Can be used to create unique designs and patterns in various colours
- Is low maintenance yet long lasting
- Is soft underfoot and easily cleaned

RUBBER WETPOUR

CREATING FUN, SAFE AND VISUALLY PLEASING SURFACES

Synthetic Grass and Rubber Surfaces have been specialists in playground safety surfacing for over 30 years. Experts in supply and installation in schools, kindergartens and public playground, we are also a Local Government Approved Contractor.

Rubber wetpour is arguably the safest surface for high risk areas.

Rubber wetpour is a poured in place surface developed for a range of applications to provide maximum safety and play value. Rubber wetpour consists of a base layer, made from recycled rubber bonded with polyurethane and a wear layer (the colourful top layer) that is created from rubber granules (or shred) bound with a polyurethane resin to form a continuous, seamless surface.

The product does not need a flat surface for installation. With a team of highly skilled installers, we can create seamless shapes/ colour splits, while working around existing playground equipment, tree roots and pathways.

OUR RUBBER WETPOUR SURFACING IS;

- Durable and long lasting
- Easily cleaned
- Environmentally friendly and non-toxic
- Low maintenance
- Resistant to Australian elements
- Slip and vandal resistant
- Drains quickly but is safe when wet
- Doesn't hide debris or vermin for easy cleaning
- Can be laid on a variety of existing surfaces including concrete, steel, tiles and pavers

We have a range of different rubber wetpour products to suit your budget and surface application. Contact us today to find out how we can best suit your needs.

OUR WARRANTIES

Due to the wide range of products and services available, the warranties for each may differ. Synthetic Grass & Rubber Surfaces aims to provide a high quality product and service everytime. Listed below are the warranties for both grass and rubber products.

OUR WARRANTIES

We are proud of the quality of our products and workmanship and offer the following warranties:

Twelve month workmanship and installation warranty on both our synthetic grass and rubber wetpour products.

In addition we provide a warranty against UV degradation on our synthetic grass from 5-10 years depending on the grass type.

EXTENDED WARRANTIES

We can provide extended warranties subject to application, along with our maintenance program. Please enquire to discover how you can lengthen the life of your installation.

INSTALLATION WARRANTY (12 months)

We provide a 12 month Installation Warranty against any defects due to or workmanship on all our rubber wetpour and synthetic grass installations.

EXTENDED WARRANTY (5 Years)

This extended warranty is only available in conjunction with the uptake of our 12 Month Cleaning & Maintenance Program. We will visit the site and revitalise your surfacing on a regular basis, giving you peace of mind that your playground or sports surface will continue to perform to its' full potential for many years to come.
