## Sliding Shutters

## Bi-Fold Shutter

After 35 Years in the window furnishing industry we have researched this shutter product intensely, that's why we bring you one of the best quality shutters on the market, being Australian made we have that local support, we take pride in the finished product from selling to the completed installation.

# Introducing Polyshield Shutters

*"Add a touch of class and enhance any room with our Australian made Polyshield Shutters"*

Shutters are one of the most practical & functional window coverings in today's market, with proven insulation & noise cancelling properties, easy maintenance, this product is taking the window industry by storm. Control your privacy and airflow by rotating the louvres to suit your situation. Adding value to your home whilst saving on energy costs at the same time

Available in Hinged, Sliding, Fixed or Bi-fold we use an aerofoil blade size of 89mm, with a frame option to suit your window. The exposed back tilt bar gives you a full uninterrupted view.

Australian made shutters can be installed in approx 4 weeks, imported shutters will take between 8-10 weeks.

## What are PolyShield Shutters ?

Polyshield Shutters are made of highly durable thermoplastic; a plastic polymer that can be recycled and shaped to take up any form. Polyshield shutter material is made of 57% salt and 43% of natural gas or crude oil extracts. Therefore Polyshield Shutter material is unique and capable of performing what other plastics cannot, excellent durability, corrosion & chemical resistance and insulation qualities.

# .....Why Choose Polyshield Shutters ??????

## 1. PROUD TO BE AUSTRALIAN MADE

Most shutters sold today are manufactured and imported from overseas, but Polyshield Shutters are all manufactured here in Australia. All shutters pass through extensive quality control, to ensure that every part of the product is of the utmost quality.

## 2. QUICK DELIVERY

Since our shutters are locally manufactured, we can deliver in the shortest lead time. Most imported shutters, take 8-10 weeks plus time to install. Our Delivery is 4 weeks to supply & install.

## 3. ENERGY EFFICIENT

Our Shutters are an engineered timber substitute that performs better, lasts for longer, and insulates up to 70% more efficiently than traditional wood. Make that saving today on your energy bills.

## 4. WARRANTY

Backed by a 20 Year limited manufactures warranty. Australian and locally made you will never have to worry about the finished product being completed.

## 5. MOISTURE RESISTANT

Polyshield Shutters are moisture resistant, with no issues installing them in highly humid areas like bathroom windows, over the kitchen sinks or windows adjacent to a swimming pool. They are the perfect choice for coastal areas and humid climates.

## 6. TERMITE FREE & FIRE RETARDANT

Unlike Timber shutters, Polyshield Shutters are absolutely impervious to termites, and are Fire Retardant.

## 7. ECO FRIENDLY & UV RESISTANT

Polyshield Shutters are a Synthetic material derived from natural resources and are UV Stabilised to avoid discoloration.

## 8. MAINTENANCE FREE & EASILY CLEANED

Polyshield Shutters are engineered to perform perfectly for life. They are easy to clean, just like furniture dust lightly and wipe with a damp cloth. They'll look beautiful in your home day after day.
