

Air conditioning for a smart home.

Just ask Smart Alec

For precision control of your ducted air conditioning.

iZone puts you in control.

iZone's new generation climate control system works with all leading brands and offers complete control over your ducted air conditioning system.

iZone's intuitive touch screen interface is elegant, easy-to-use and exceptionally efficient.

¹ Certain models only. ² Coming Soon

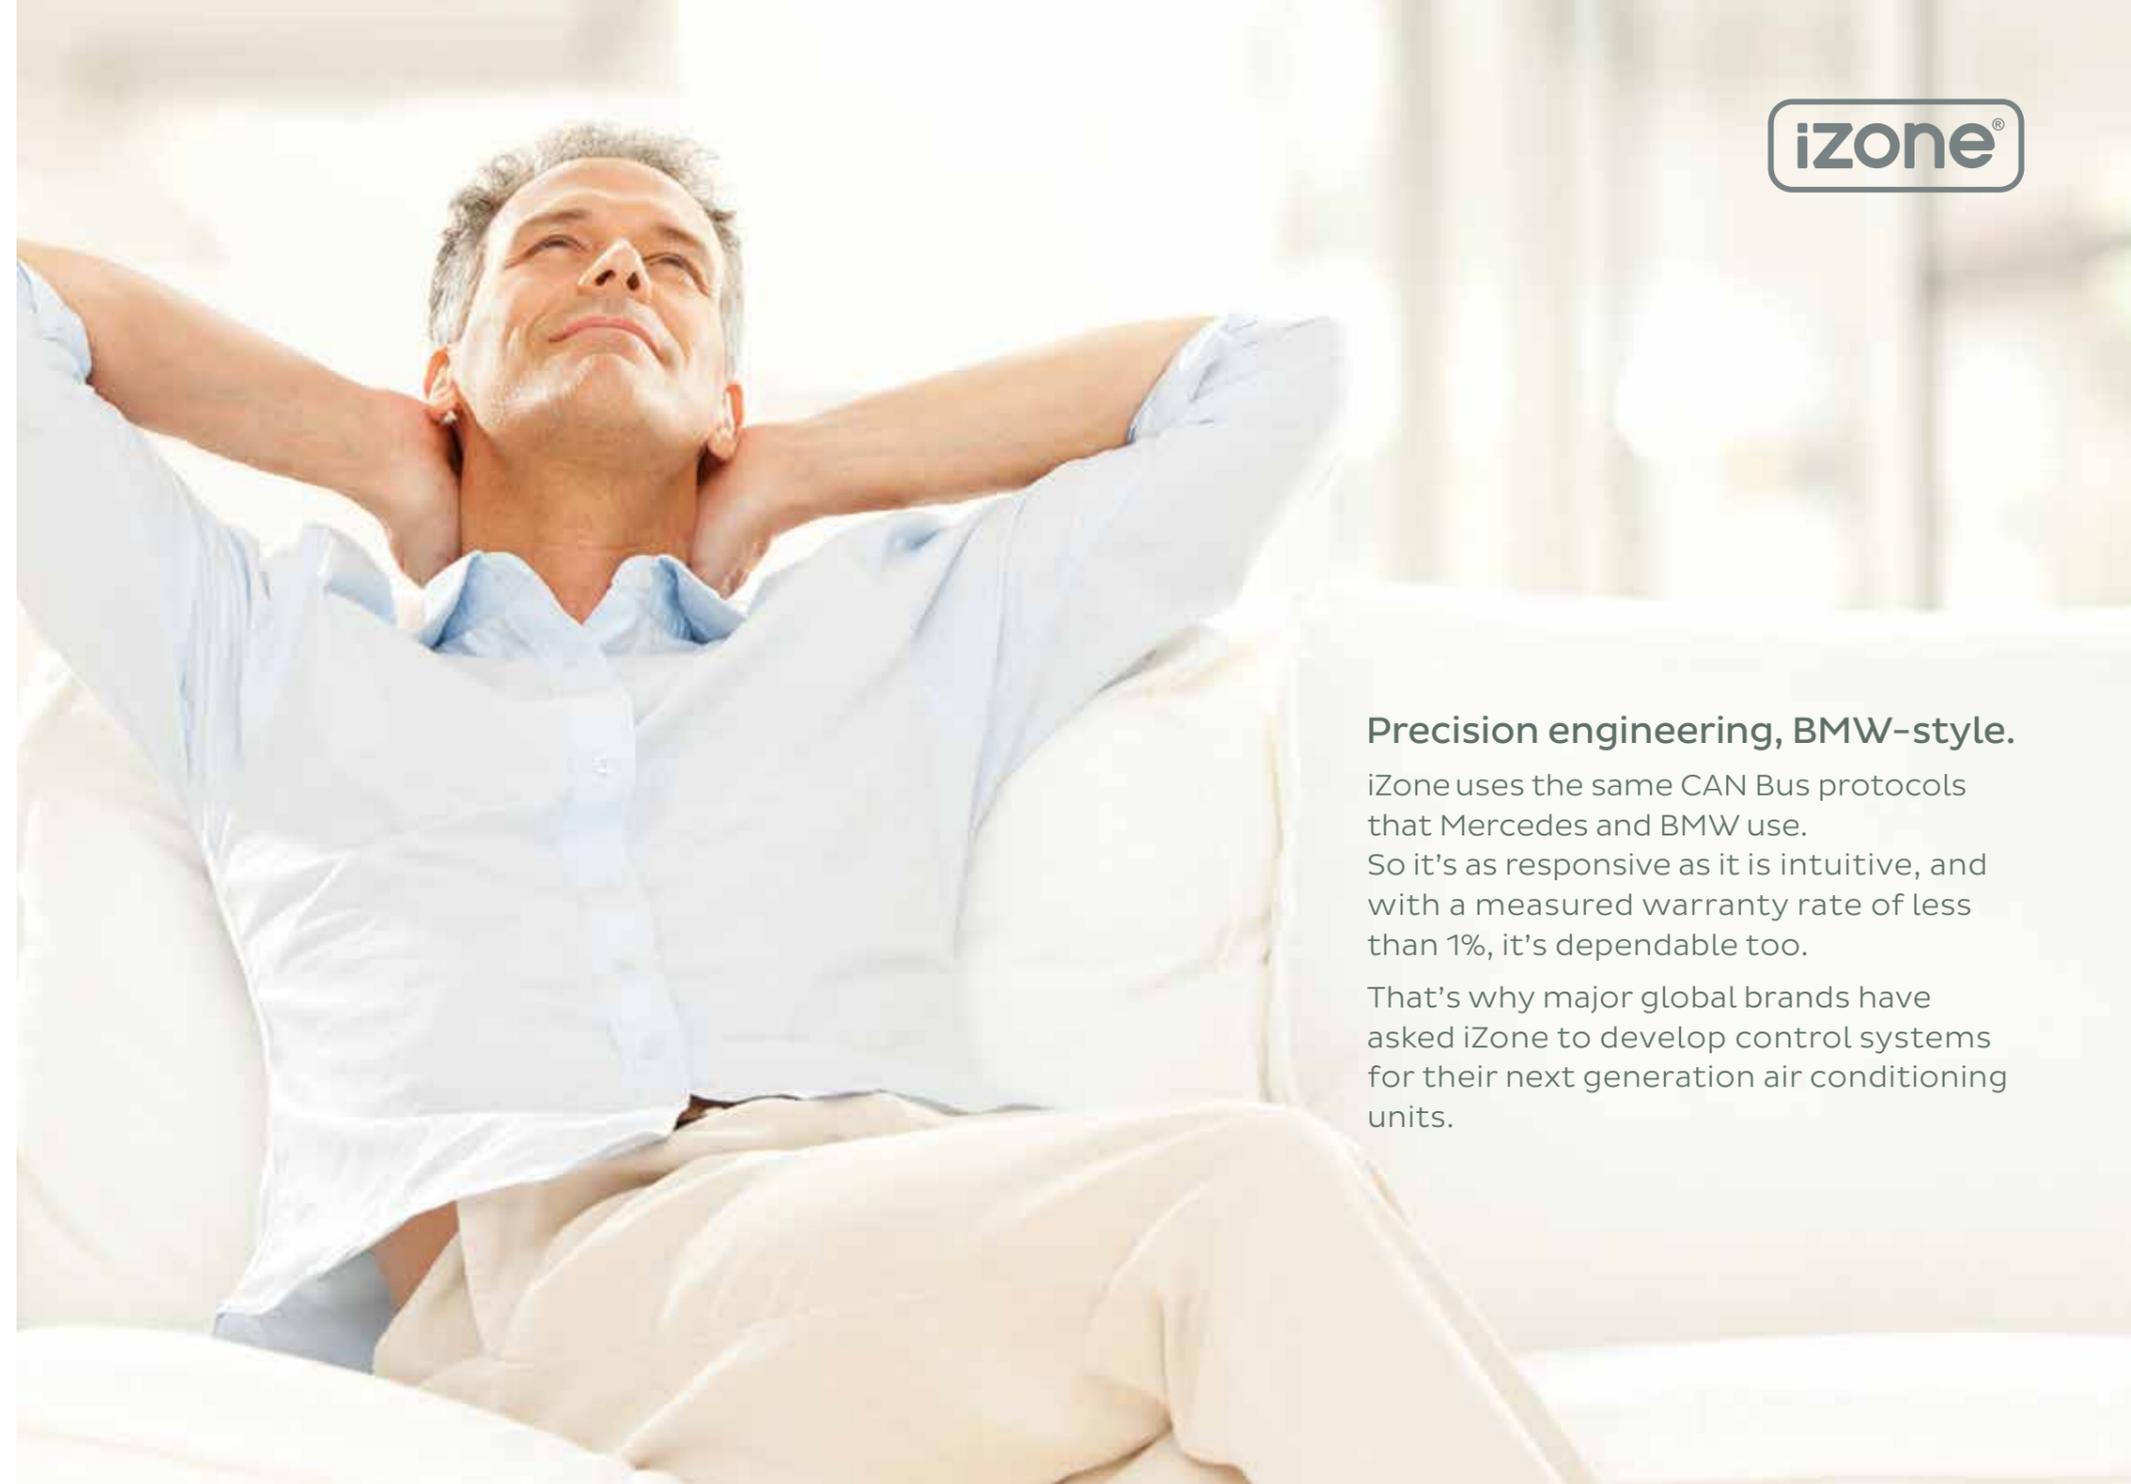

iZone®

Precision engineering, BMW-style.

iZone uses the same CAN Bus protocols that Mercedes and BMW use. So it's as responsive as it is intuitive, and with a measured warranty rate of less than 1%, it's dependable too.

That's why major global brands have asked iZone to develop control systems for their next generation air conditioning units.

iZone works harder, so you don't have to.

iZone's touch screen technology gives you total temperature control of each room individually. Adjust the air distribution, temperature or airflow to any room.

Select up to 14 sensors – every room will be at the temperature you want, all the time. You can also direct airflow to only the rooms you choose for maximum efficiency and savings.

For even more control, ask about the iSense controller, which maximises efficiency by detecting which rooms are unoccupied, to provide cooling and heating only when and where you need it.

iZone functionality makes life easy for you.

iZone App

The WiFi and 4G enabled iZone App enables you to control your air conditioning system via your smart phone or tablet.

The iZone Worldwide service allows you greater control, giving you 4G access from anywhere, for even more efficiency and savings. Now the whole family can come home to the perfect temperature.

Easy on the eye – and your pocket

iZone offers a choice of elegant control consoles or sensors that you can customise to suit your home's interior design. Changing the background colours on your controllers is as straightforward as choosing the precise temperature you want.

iSense room temperature control for optimal efficiency

This clever zone controller detects if a room is unoccupied. iSense will then automatically adjust the room temperature or switch off the air conditioning to that room. iSense significantly improves energy efficiency and reduces the running cost of ducted air conditioning system's in homes and offices, directing the airflow only to the rooms you are using.

Home automation integration

iZone uses the latest technology, so you can integrate your air conditioning with other home automation systems, to make it even easier to control the temperature of every room in your home.

Set and forget

Create up to 9 'favourite' zone scenarios to suit your lifestyle, then schedule these 'favourites' to match everyday living. But for a quick set and forget 'system off' timer, just press the four-setting sleep timer button and iZone takes care of the rest.

iZone is smarter too.

iZONE SMART FEATURES

- Compatible with other home automation systems ✓
- In duct supply air sensor for improved efficiency and temperature control ✓
- Roaming sensor to ensure every zone is maintained at the exact temperature ✓
- Temperature sensor in every touchscreen controller ✓
- Zone on/off button on every sensor ✓
- iSense Occupancy sensor with backlit display and full in room temperature control ✓
- Colour match sensor to light switch ✓
- Fan auto control to maximise comfort and minimise energy consumption ✓
- All sensors can be calibrated for precision control ✓
- IFTTT compatible ✓
- Google Home compatible ✓

Complete confidence and a full 10-year warranty.

As an Australian company, we understand Australia's unique climate, plus we're here for you if you need us.

What's more, because quality is our priority, we're able to offer a full 10-year warranty.

10-YEAR
WARRANTY*

* 2 years plus 8 year extension. Conditions apply.

izone®

iZone smart solutions.

iZone precision engineered products and innovative technologies deliver unrivalled efficiency and control throughout your home. They save you money at the same time as keeping your family comfortable all year round.
